Workshop on "Data Structures & Algorithms in Java" 2020

On 26th April 2020, Sunday. Great Learnings collaborated with Department of Computer Science & Applications, Panjab University to host a workshop on 'Data Structures & Algorithms in Java'. The session was conducted by Mr. Vishwa Mohan, Sr. Software Engineer, Ex-Walmart, Ex- Paypal, IIT-BHU Alumnus.

About the event:

Online webinar dated 26 April 2020 with mentor Mr. Vishwa Mohan, IIT-BHU Alumnus was centred about Data Structures and algorithms in Java. In total 79 students from the department attended the online workshop.

The sessions primarily covered the various data structures like linked lists, queues, stacks, sorting techniques and related complexity concerned with each of the structure. Different algorithms with each of the data structure was explained. The complexities of the sorting techniques along with their implementations was discussed.

The overall motive to explain the brief about the whole concept was covered and guidelines were given how to implement these structures. The students found the session of great help for the coding test rounds in placements and the technical interview round. The doubts were taken after the session was over. The overall experience of the session was great and tough topics were covered with great a good approach.
