Vice Chancellor's Message

It gives me immense pleasure to note that Department of Computer Science and Application, Panjab University is bringing out a Training and Placement Brochure for the Department as well as our Two Regional Centres i.e. Panjab University Regional Centre, Shri Muktsar Sahib and Panjab University Swami Sarvanand Giri Regional Centre, Hoshiarpur. I am given to understand that academic session 2021-22 proved to be another milestone in the history of Training & Placement Cell, DCSA. More than 75% of students have been placed in 55+ companies with a highest hitting exemplary mark of Rs. 16.6 lac per annum while the average package was Rs. 5.6 lac per annum. The Department is providing structured education and promoting students mental and psychological growth inculcating in them virtues of unity, positive thinking, team work, good manners, genius and talent and provides an all inclusive academic ambience with the remarkable improvement in placement in the last 2-3 years. Such institution have a major responsibility in nation building through enriching science & technology in the skills of students by arranging workshops and seminars at regular intervals.

My best Wishes to the faculty and staff of the Department .

Dr. Raj Kumar
Vice Chancellor
Panjab University

Director, Central Placement Cell Message

Dear Recruiters,

I am pleased to learn that Department of Computer Science & Applications is bringing its placement brochure. For the past 3 decades, this department has been one of our most prestigious institutes, offering Master's and Doctoral courses in Computer Science. DCSA has been honing the skills of students by organizing programs for teaching and research communities. The success of the department lies in its consistent effort towards achieving the aim of ingenuity, innovativeness, and technical competence in the students through rigorous competition and regular guidance.

The Institute provides an inclusive, diverse, industrious and comprehensive environment for the growth and development of its students. In accordance with the current demands of the corporate world, the department provides industry experience by professional experts in the field of competitive coding and data science.

Amidst these trying times, the department has consistently maintained the highest standards of education and did not let the pandemic have a severe impact on the future prospects of our students. With its remarkable efforts and esteemed faculty, the academic session of 2021-22 marked a placement of more than 75% in 55+ companies. Our students have continued to carry forward our legacy of excellence. We have immense faith in their ability to carve out a niche for themselves within the highest corridors of academic and industrial excellence.

Dr. Rohini Sharma

Chairperson

I extend a very warm and cordial invitation to companies in Information Technology Sector for the placement of our students of MCA and M.Sc. (Computer Science) under the framework of Honours School.

The Department of Computer Science and Applications was set-up in 1983. The Department runs Master of Computer Applications (MCA) (3 years full time course) introduced in 1992, Masters of Computer Applications (3 years full time course) in Self Finance mode introduced in 2008 and Masters of Science (Computer Science) under the framework of Honours School introduced in 2004. Admissions to these courses are held through Annual Entrance Test conducted on All India basis by Panjab University. Ph.D. Programme was introduced in the Department in 2005. The department has well-equipped labs and its own well-equipped library with over more than 10,000 books and resources. The syllabi of MCA and M.Sc. are updated regularly keeping in mind the needs of the industry. We prepare students intellectually and psychologically to face the challenges of globalized environment. A total of about 150 final year students from Post-graduate courses distributed in Panjab University Campus, Panjab University Regional Centers (Mukstar & Hoshiarpur) will pass out in May-June, 2023.

I am feeling very proud to share that our students receive excellent placement offers from reputed organizations in India. Our students have excelled in corporate sectors and have been part of projects in ISRO, DRDO and other PSUs. Mission of the department is to provide quality trained manpower to industry to meet national/international requirements in the emerging areas of computer science. I am very sure that our students can face every challenge to put before them and will be successful in meeting the expectations all through.

Dr. Anu Gupta

Training Placement Head

It gives me immense pleasure to extend a cordial invitation to your organization on behalf of Training and Placement Cell, Department of Computer Science and Applications (DCSA), Panjab University, Chandigarh. The key strengths of DCSA are the highly proficient students, dedicated and research-oriented faculty, staff and state of the art infrastructure. Our Syllabus is regularly being updated with inputs from the industry to produce competent software professionals. The students are encouraged to take up practical training and gather hands-on experience on the real life applications. DCSA strives hard to offer value-based education to students and make them acquiescent to the dynamic requirements of the world.

The Training and Placement Cell boasts of maintaining an excellent rapport with a wide spectrum of companies. Under the guidance of faculty coordinators, a team of highly motivated students toils to establish linkage between the companies and the students. The cell regularly organizes pre-placement workshops for enhancing the technical and soft skills of students by inviting prominent HR consultants and senior executive/technocrats from leading organizations. During the trying times of the pandemic, numerous webinars and workshops have been conducted successfully to strengthen the technical skills as well as to boost the morale of students.

DCSA has an impeccable campus placement record. Our students have secured challenging positions in top ranking organizations in India and abroad. Their capabilities have always been highly recognized by esteemed recruiters. We truly appreciate various organizations for the faith bestowed on us and look forward to continue our relationship with them. We hope that the incessant efforts of our students will be able to raise the bar of competition and make a mark in the Industry.

ABOUT PANJAB UNIVERSITY

Panjab University is a prestigious and one of the most highly ranked public university located in Chandigarh, India. Originated in 1882 as the University of the Punjab and was re-established in 1947 after the partition of India .

The university has 78 teaching and research departments and 15 centres/chairs for teaching and research at the main campus located at Chandigarh. It has 188 affiliated colleges spread over the eight districts of Punjab state and union-territory of Chandigarh, with Regional Centres at Muktsar, Ludhiana and Hoshiarpur cities in Punjab state.

The campus is residential , spread over 550 acres in sector 14 and 25 of the city. The main administrative and academic buildings are located in sector 14, beside a health centre, a sports complex, hostels and residential housing.

With the establishment of 138 years and reestablishment of 74 years, the university has produced a number of alumni who have earned name and fame both for themselves and the university.

RANKING

Internationally, Panjab University was ranked 601-800 in the World, 175 in Asia and 301-350 among BRICS nations in the QS World University Rankings of 2021. It was ranked 601-800 in the world by Times, Panjab University World University Rankings of 2020.

In India, the National Institutional Ranking Framework (NIRF) has ranked Panjab University 23 in 2021, 23 among universities, 70 in the engineering ranking, 42 in the management ranking and second in India in the pharmacy ranking.

- Ranked number one amongst Universities in India and Ranked 363 in the Thomson Reuters-powered 'Best Global Universities Rankings 2016' by US News and Global Report.
- Ranked 38 in Asia Times Higher Education Asian University Rankings, 2015.
- Ranked in the bracket 501- 600 internationally in the Times Higher Education World University Rankings, 2015-2016.

International Collaborations :

The University recently signed MoUs with University of Nottingham (UK), University of Birmingham (UK), Nottingham Trent University (UK) and University of Western Sydney (Australia).

PU also has collaborations with National Science Technology and Development Agency, Thailand; University of Missouri, USA.

Morocco for a joint collaborative project funded by the CGIAR consortium, funded by organisations such as UNDP and FAO, USA, UK, and Germany; International Centre for Agricultural Research in Dry Areas (ICARDA), Morocco; World Vegetable Research Centre, Taiwan through its South Asia Centre at Hyderabad and Baylor Medical centre, Dallas, U.S.A.

National collaborations:

The University has various prestigious collaborations with a number of national institutes like Indian Agricultural Research Institute, Delhi; GB Pant University of Agriculture and Technology, Pantnagar ; Himalayan Forest Research Institute, Shimla; IIT, Roorkee; PGIMER, Chandigarh; Nuclear Science, Delhi; IMTECH; CSIO, Chandigarh; Institute of Nuclear Medicine and Allied Sciences (INMAS), New Delhi; Jamia Hamdard University, Delhi; Atomic Energy Regulatory Board of India, Mumbai; Central University, Hyderabad; Agriculture University, Palampur; Inter University Consortium (Kolkata & Bhubaneswar).

Total students - 25,057

- 63.5% UG students
- 36.5% PG students

International students - 400

- 66.9% UG students
- 33.1% PG students

The **Department**

The Computer Culture at the Panjab University dates back to 1966. An independent Centre for Computer Science and Applications (now a full fledged department) was set-up in 1983. The department aims at ingraining the spirit of ingenuity, innovativeness and technical competence in the students through rigorous competition and regular guidance. The department also caters to the need of users in the region and organizes training programmes for teaching and research communities.

From the humble beginnings in 1992-93, the department today has expanded to three centers including the two regional centers at Hoshiarpur and Muktsar Sahib. The student intake at the main center is approximately 80 whereas 30-40 student strength is maintained at the two regional centers. As of today, the department is running Master of Computer Applications (MCA); 3 year full time course and Masters of Science (Honors School) in Computer Science have been introduced from year 2004. Admissions are held through an annual entrance test conducted by the Panjab University. The department has put forward a special impetus into the active areas of research ever since foundation. As a step forward, Ph.D. program has been started from year 2005.

The students at the department get the opportunity to work on the latest hardware technologies (Intel core i7 with ddr4 rams), and have the unique opportunity of working in various development environments like MS-DOS, LINUX, MS-Windows, and on Internet development tools.

Department has a library with over 3500 books accessible to all the students and the faculty. The library has separate magazine and journal sections. Various computer journals are available online through the university library.

Less than

5%

of the 2000 students who appeared for the test this year eventually secured admission in MCA.

High Brass candidates admitted

1:20 in Master of Computer Science & Applications

Less than

2%

of the 500 students who appeared for the test this year eventually secured admission in MSc Computer Science.

Courses offered at Department of Computer Science & Applications

MCA
Master of Computer Science & Applications

MSc
Masters of Science (Honors School) in Computer Science

Ph.D.
Doctor of Philosophy (Degree)

Faculty

1. **Dr. Rohini Sharma M.Tech, Chairperson** Assistant Professor
   Area of Research/Expertise: Network Algorithms, Anomaly Detection
2. **Mrs. Jasleen Kaur Bains MCA**
   Area of Research/Expertise: Pattern Recognition, Image Processing
3. **Dr. R. K. Singla Ph.D** (Faculty of science),
   Area of Research/Expertise: Open Source Software Engineering, Network Security, Sentiment Analysis, Machine Learning
4. **Dr. Anu Gupta Ph.D** (Computer science), Professor
   Area of Research/Expertise: Open Source Software Engineering, Cloud Computing, Sentiment Analysis, Machine Learning
5. **Dr. Indu Chhabra Ph.D** (Image Processing with Neural Networks), Professor
   Area of Research/Expertise: Soft Computing Paradigms of Genetic Algorithms and Neural Networks, Software Engineering, Data Mining
6. **Dr. Sonal Chawla Ph.D** (Computer Science), Professor
   Area of Research/Expertise: Web Semantics, Machine Learning, Educational Technologies
7. **Dr. M. Syamala Devi Ph.D** (Computer Science and Systems Engineering), Professor
   Area of Research/Expertise: Distributed Artificial Intelligence, Image Processing, Educational Technologies
8. **Dr. Anuj Sharma Ph.D** (Computer Science), Assistant Professor
   Area of Research/Expertise:Pattern Recognition, Machine Learning
9. **Dr. Kavita Taneja Ph.D** (Computer Science), Assistant Professor, Training & Placement Officer
   Area of Research/Expertise: Wireless Networks, MANET, Information Computing
10. **Mrs. Balwinder Kaur MCA,** Assistant Professor
    Area of Research/Expertise: Data Mining, Software Engineering
11. **Dr. Anuj Kumar M.Tech,** Assistant Professor, Training & Placement Officer
    Area of Research/Expertise: Image Processing, Pattern Recognition
12. **Mrs. Supreet Kaur Mann M.Tech,** Assistant Professor
    Area of Research/Expertise: Machine Learning, Wireless Sensor Networks
13. **Mrs. Anjali Jindia MCA,** Assistant Professor
    Area of expertise: Operating Systems, Software Engineering

Student Achievements

National Eligibility Test

The National Eligibility Test (NET), also known as UGC NET or NTA-UGC-NET, is the test for determining the eligibility for the post of Assistant Professor and/or Junior Research Fellowship (JRF) award in Indian universities and colleges. UGC NET is considered as one of the toughest exams in India, with success ratio of merely 6%.According to recent report of National Testing Agency(NTA), total 10,34,872 candidates have applied for December 2019 examination, covering 81 subjects, across 700 centers in 219 cities.Over 10% of our students have cleared UGC NET exam this year.

Google Summer of Code

GSoC and Season of KDE, is an international annual program in which Google awards stipends to all students who successfully complete a requested free and open source software coding project during the summer, Many selections in GSoC and season of KDE in past years.

Smart India Hackathon

Smart India Hackathon: In order to work towards our PM's Vision. MHRD, AICTE , IICR and Presistent Systems organized Smart India Hackathon , a unique Initiative to identify new and disruptive digital technology innovations for solving the challenges faced by our country. Our University's Team Managed to bag 1st Prize in a Software Problem Category.

Fests

Various Colleges in Chandigarh organises IT FESTS and various other Departmental Fests every year and our Students take active participation in every fests and has won lots of prizes in all the Technical as well as Non- Technical events.

HackUICET

HACK-UICET is the portmanteau of "Hack" with "UICET". The marathon of Hack at Aanwik in this you have to find the solution to a problem in a limited time frame of 24 hours. Students work in a team to create something by Ideation and designing rapidly and make a focussed effort to scrabble together a working app, system, software, algorithm, etc. to make this world a more sustainable place to live. Our Students Bagged 2nd prize in this and developed a Blockchain based solution for healthcare named "MediChain".

Blockchain

Our students has developed a Blockchain based ERP solution for NITTTR Chandigarh under the guidance Mr. Saurabh Kaushal the Technical Administrator of NITTTR Chandigarh.

A Comprehensive **Curriculum**

Department of Computer Science and Applications, Panjab University has played a pioneering role in the introduction of innovative courses in its MCA & M.Sc. (Computer Science) programs. Every year, new courses are introduced, and changes are made in current courses, to keep students in sync with the latest developments in the field of technology education. The department aims at ingraining the spirit of ingenuity, innovativeness and technical competence in the students through rigorous competition and regular guidance and offers the maximum number of elective courses in its MCA program, giving students a huge variety of courses to choose from, depending on their interests and career plans. Panjab University has also been at the forefront of education for more than last three decades and has been widely acclaimed for various customized programs it has introduced based on its front line teaching, research and experience. The department has made sure to meet the changing needs of technology organizations and their functional managers. It is for nothing that recruiters have reposed their greatest confidence in department students, year after year.

MASTER OF SCIENCES (COMPUTER SCIENCE)

FIRST YEAR

FIRST SEMESTER

- Software Engineering
- Data Base Management System
- Operating Systems
- Analysis and Design of Algorithms
- Practical based on Data Base Management System
- Practical based on Analysis and Design of Algorithms

SECOND SEMESTER

- Advance Java and Network Programming
- Artificial Intelligence (Using LISP)
- Interactive Computer Graphics
- Theory of Computations
- MOOC
- Practical based on Advance Java and Network Programming
- Practical based on Interactive Computer Graphics

SECOND YEAR

THIRD SEMESTER

- Soft Computing Techniques using Neural Networks
- Software Project Management
- ASP.NET Using C#
- Computer Based Optimization Techniques
- Practical based on Soft Computing Techniques using Neural Networks
- Practical based on ASP.NET Using C#

FOURTH SEMESTER

- Major Project (SRS, DFD, Database Design, Input/output Design, Coding, Testing & Deployment)

MASTER OF COMPUTER APPLICATIONS

FIRST YEAR

FIRST SEMESTER

- Programming in C
- Computer Organization and Assembly Language
- Data Base Management Systems
- Mathematical Structures in Computer Science
- Linux Operating System
- Programming in C (Minor Project)
- Linux Operating System (Minor Project)

SECOND SEMESTER

- Data and File Structures(Using C)
- Object Oriented Programming (Through C++ And Java)
- Data Communication and Networks
- Computer Based Numerical and Statistical Methods
- Accounting and Financial Management
- MOOC
- C++ and Java Programming Language (Minor Project)
- Data Structures (Minor Project)

SECOND YEAR

THIRD SEMESTER

- Software Engineering
- Operating Systems
- Analysis and Design of Algorithms
- ASP.NET Using C#
- Relational Data Base Management Systems
- RDBMS (SQL Server/Oracle/My SQL) (Minor Project)
- Programming in ASP.NET Using C# (Minor Project)

FOURTH SEMESTER

- Data Warehousing and Data Mining Techniques
- Interactive Computer Graphics
- Theory of Computations
- Artificial Intelligence (Using LISP)
- Advanced Java and Network Programming
- Computer Graphics and Algorithms Analysis (Minor Project)
- Advanced Java and Network Programming (Minor Project)

THIRD YEAR

FIFTH SEMESTER

- Computer Based Optimization Techniques
- Software Project Management
- Mobile Communication and Application Development
- Soft Computing Techniques using Neural Networks
- Mobile Application Development using Android (Minor Project)
- Programming for Basic MATLAB & Soft Computing Techniques (Minor Project)

SIXTH SEMESTER

- PROJECT WORK: The Project period will be of 16 to 20 weeks duration. The Project will involve development of application/system software in industries, commercial or scientific environment.

Research

Computer science is a dynamic and diverse field that plays a vital role in all aspects of society. Our renowned faculty covers the many facets of modern computer science, from theory to the design of practical systems. The strength and reputation of the department's research attract industry collaborations around the world.

Dr. Ajay Dutta
Department of Computer Science & Application

Design of UID based Online Census System for Electronic Governance

In this research work, the UIDOCS system is designed, developed and tested. The UIDOCS includes automation of census data collection and utilization of census database for e-Governance applications. The automation of census database includes the implementation of several components named as online census data capturing, citizen existing information fetch from UIDAI database, updation of birth and death records in census database, real-time monitoring of census survey and online census data utilization for next census survey.

The utilization of census database for e-Governance applications includes the implementation of three components named as citizens' census data sharing with e-Governance application, unemployment allowance allocation for budget planning and the opening of new educational institutions requirement analysis. At last, the historical census data is used to predict population for future population estimation. A simulated rural area certificate application was developed and integrated with online census database for verification of census data sharing web service.

The UIDOCS system helps in reducing process time in data collection and analysis. The purpose of present research is to establish a web service for managing national census data. The UIDOCS system helps business executives, researchers and students to make analyses of census data with the graphical user interface.

Multi Agent based Integrated Scheme for Network Intrusion Detection

Multi-agent based Integrated Scheme for Network Intrusion Detection (MAISNID) use agents to detect attacks in the network and to prevent human intervention. MAISNID consists of three agents: Interface agent (IA), Training Agent (TA) and Detector Agent (DA). IA performs functions like capturing of network packets and extract useful features from them. It also keeps track of Internet Protocol (IP) addresses which are affected by attacks and sends this information to the administrator for further action. TA trains the decision tree model and computes frequency vector of packets payload. DA is a mobile agent which collects packets from various machines in the network by migrating itself along with minimum information. Then DA predicts the class of coming packet by moving to the machine where database resides and sends related information about anomalous packets to the administrator. The proposed integrated intrusion detection system is tested on standard dataset i.e. DARPA and collected dataset of Panjab University. On DARPA dataset, the testing is done on three ports, namely, port 21 (FTP), port 23 (TELNET), and port 80 (HTTP). On university dataset, the testing is done on port 80 (HTTP) and port 443 (HTTPS). The integrated scheme combines the both misuse-based approach and anomaly-based approach and performs better than each technique individually as observed from results. The main benefit of integrated scheme is that it can find out both known and novel attacks in the network. This system helps in the analysis of network packets, detecting affected machines in the network, and reduces processing time in detecting anomalous network packets.

"I don't believe in taking right decisions I take decisions and make them right."

- Ratan Tata

Solving Large-Scale Machine Learning Problems

- Characterised big data challenge in machine learning, recent research directions and identified different areas to tackle the challenge
- Proposed mini-batch block coordinate optimisation framework to solve big data problems
- Proposed variance reduction techniques, viz., SAAGs(I-IV) using first order methods.
- Proposed simple sampling techniques to reduce the overall training time of large-scale learning problems.
- Proposed stochastic inexact Newton to deal with the large-scale learning problems.
- Proposed mini-batch block-coordinate Newton method
- Developed LIBS2ML library for large-scale learning

Dynamic Hand Gesture Recognition using neural network

Hand gesture recognition system is used for interfacing between computer and human using hand gesture. We wish to make a windows-based application for live motion gesture recognition using webcam input in C++. This project is a combination of live motion detection and gesture identification. This application uses the webcam to detect gesture made by the user and perform basic operations accordingly. This is very useful for a hands-free approach.

Cold Boot Attack

This project is a Proof of Concept(POC) for capturing memory dumps from Intel x86-64 based PC system. RAM persistence can be exploited using both hardware and software mechanisms. However, exploit requires a certain amount of specialized expertise and a willingness and/or opportunity to dissect the obtained information that will be not necessarily in human readable form.

Where our students research ...

UNIVERSITY OF CAMBRIDGE | University of Glasgow | Berkeley

Startup by Our Student

ME | moroesports

Founded in August 2020, MoroEsports is a bootstrap esports & gaming media startup by DCSA alumnus Mohit Kumar. It operates as esports & gaming media startup with highest #13,640 website rank in Alexa India Rankings. The startup got an invite from prestigious institutions like IIT Kanpur, NIT Hamirpur, and VIT Vellore for their annual tech and gaming fests.

With the rise of gaming market in India, they were approached by two investors to scale up. Currently with a team of over 12 members, moresports is shaping the esports & gaming ecosystem in India.

CAMPUS PLACEMENT PROGRAM 2021-22

Panjab University welcomes you to participate in the Campus Recruitment Program 2021-22. The placement process provides a unique platform for the students to showcase their skill-set and the companies to recruit the potential leaders of tomorrow. Since its inception, Panjab University has played a major role in transforming students into competent global professionals contributing to the development of nation in their own way. Many of the Post Graduates have risen to top positions and entrepreneurs too.

PLACEMENT CALENDER 2021-22 (Joining Schedule):

Panjab University Post Graduate students have a comprehensive training and internship in the last semester. According to the ongoing trends of the company the students undergo training in their respective fields. The joining dates of the students is from January 2022. The students will be allowed to participate in the training provided by the company and their contribution will be reported to the department as a final report for last semester.

PLACEMENT PREPARATION

- **Workshops/ Sessions**
- **Resume Sessions**
- **Mock GD/PI Preparation Sessions**
- **Case Study Workshops**
- **Career Awareness Workshops**
- **Soft Skills/Personality Development Workshops**

PLACEMENT PROCESS

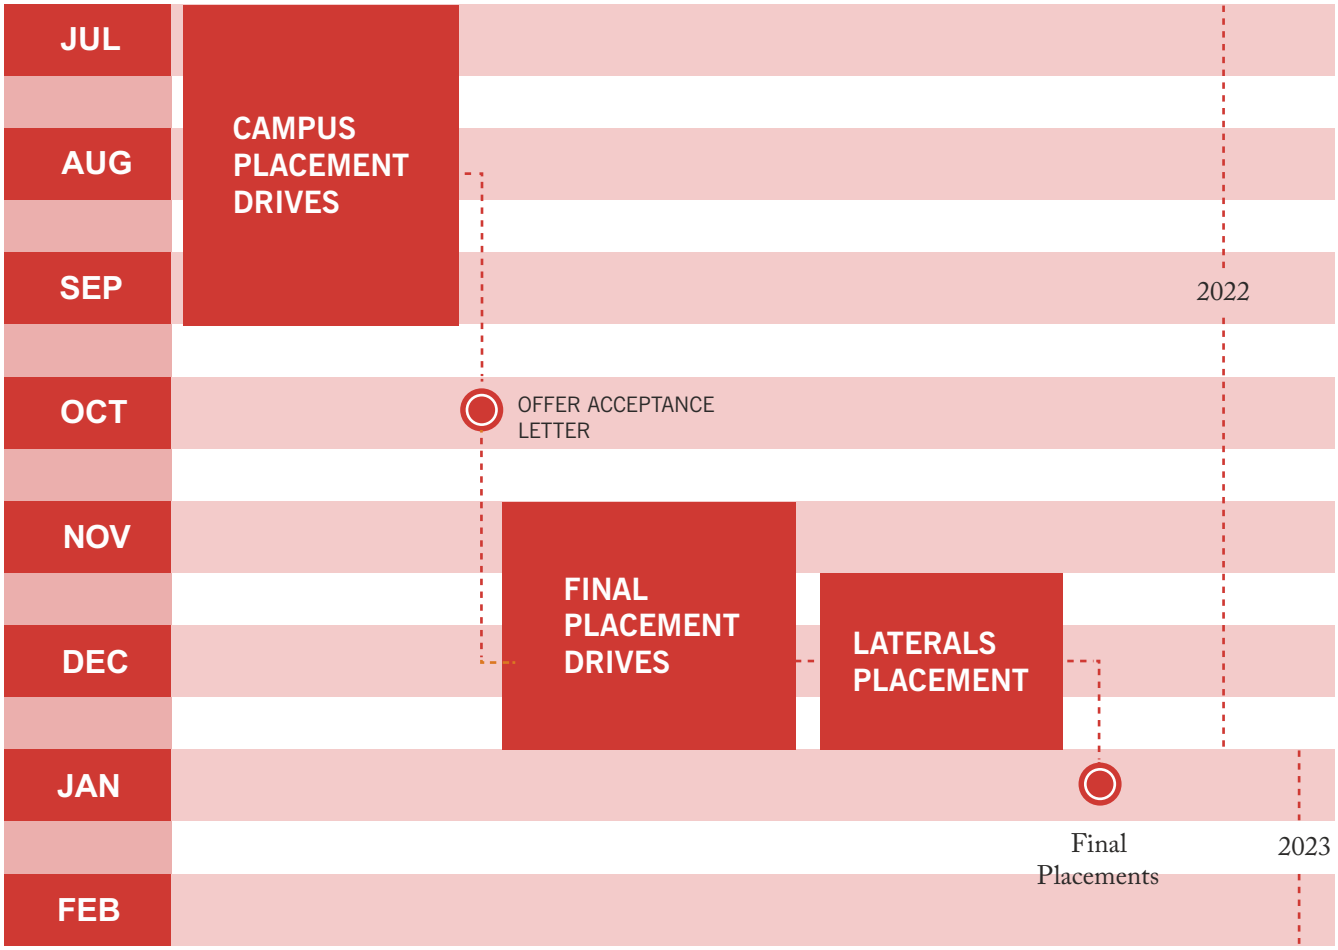

ASSISTANCE DURING CAMPUS RECRUITMENT DRIVES

The Training& Placement Office will be pleased to coordinate your campus visit with the following assistance:

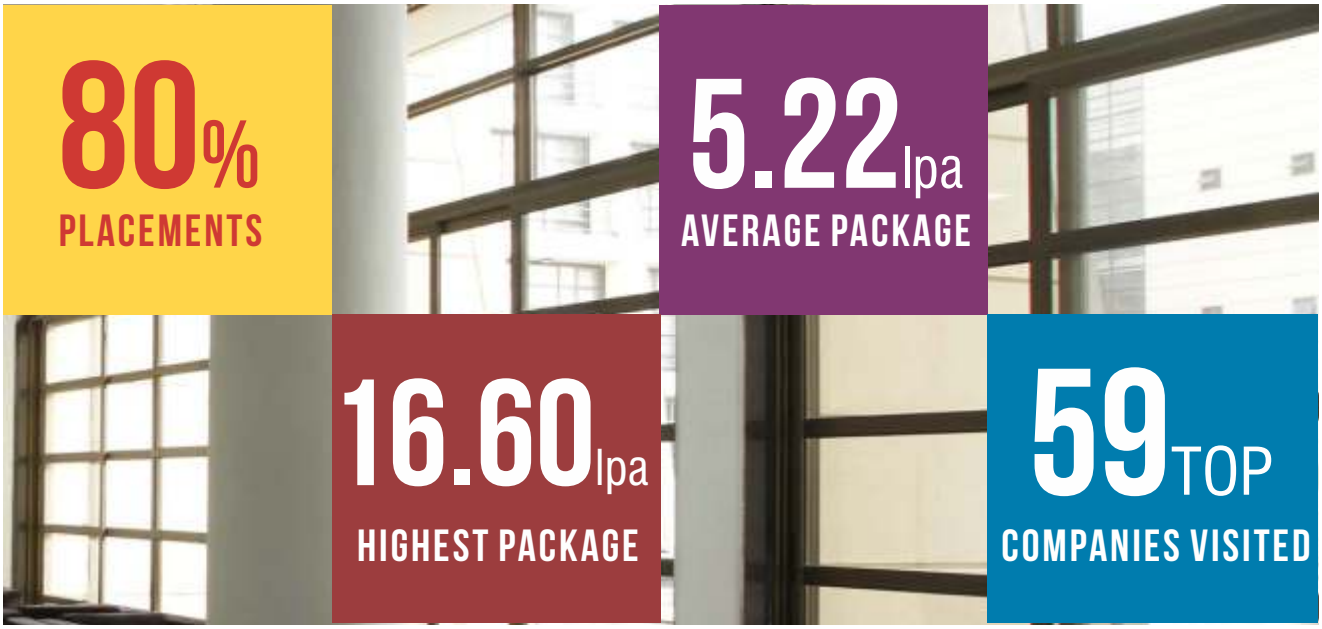

- Display of company's publicity material at appropriate Notice Boards.
- Announcement of the job openings on the calyxpod.
- Organization of Pre-Placement Talk.
- Organizing placement drive & interview sessions. Logistics for written tests, group discussions, group activities and interviews.
- Providing resumes of candidates for short-listing.
- Video Conferencing facility.

Recruitment **Calender**

** Tentative Dates. Companies are required to provide the offer letter by the given dates.*

Beyond **Academics**

Department of Computer Science & Applications promotes a host of Student activities through its workshops, Alumni meets, Technical Clubs, Tech talks, workshops and its Annual IT Fest - 'EPSILON'. Students get a chance to polish their soft skills, develop leadership and organizational qualities which are essential in every professional domain. Many co-curricular activities like poster making competition, plantation drive ,festive celebrations etc. are held to complement students talent.

Epsilon - The Annual IT Fest is the celebration of the innovative spirit of technology. It is a technical and cultural fest conducted every year with full enthusiasm. Various events are conducted ranging from technical events to non-technical events. Technical events include 'PPT ka Dum', ' Debugging',' Web Development', 'LAN Gaming', 'IT Quiz', 'Debates', 'Coding' and 'E-Collage' etc and non-technical events include 'Ad-mad', 'Movie Making', 'Dance', 'singing', 'Treasure Hunt' and many more which help the students to enjoy and showcase their talent in various fields.

Workshops and Tech talks - Various workshops and Tech talks are conducted in the department like 'Data Structure and Problem Solving for interviews', 'Augmented & virtual reality', 'Deep learning models', 'Artificial neural network', Data Science & Face Detection,'Workshops on Competitive Coding' and many more which are quite interactive, motivating and fun. Different institutes or companies come and have an interactive session with students to make them learn something new apart from the regular curriculum. Students tend to acquire knowledge about various new technologies being launched in the market.

DCSA Virtual Alumni Meet 2022- Our department organized Virtual Alumni Meet where cultural program was showcased by students,the alumni were made to play few interactive games like DCSA Picture Mosaic Game and DCSA Quiz making it a fun and interactive event.The event was registered and attended by more than 300 alumni of DCSA from different parts of the World which included USA, UK, Canada etc.

NSS

Plantation Drive: The Department of Computer Science and Application organised the plantation drive on 25th August, 2020 at 11:30 AM. The faculty and staff members of the DCSA planted saplings and watered the plants. The saplings were supplied by University.Professor R.K.Singla, Dean University Instructions, Panjab University graced the occasion with his presence.

Cleanliness Programme organised at PU South Campus: Centre for Medical Physics and NSS, Panjab University organized a cleanliness program today in the South Campus, near emerging area centres in Sector-25, Chandigarh. Dr. Vivek Kumar ,Chairperson, Centre for Medical Physics, Dr. Navneet Kaur ,Geography Deptt. Dr. Tilak Raj ,UBS, Dr. Anuj Kumar,DCSA, non-teaching staff and NSS student volunteers participated in this programme with social distancing. The main objective of cleaning was to remove polythene packets and garbage, so that people may feel happy living within that clean environment.
