WEB APPLICATION PENTESTING & WEB SECURITY

On May 2nd, 2020; Saturday, GirlScript Chandigarh conducted a webinar on *'Web Application Pentesting and Web Security.* The Speaker of the Webinar was Mr. Divyanshu Shukla.

About the Speaker:

It was a great honour to have an eminent personality, who is an Information Security Engineer with extensive industry experience in pentesting cloud, web and mobile applications. **Mr. Divyanshu Shukla** among us. Along with his experience in cyber cell, he has also got multiple acknowledgements by many big software companies (Apple Inc., Samsung mobile, Amazon.com, Alibaba etc) and got many CVEs under his name.

This event had total of 140 registrations which had 32 students from DCSA, Panjab University. The Webinar focused on central idea about web security and ethics. He told us the importance of working securely online. He guided the beginners to focus on Linux and Computer Networking. He also discussed various commands of Linux. Details of various free courses were shared. He told the audience about ethical hacking using Linux commands and networking.

It was a very good webinar and had lot to gain.
