Webinar on "*Artificial Intelligence*" 2020

On 14th May 2020, Saturday. KVCH and Department of Computer Science & Applications, Panjab University organised a workshop on "Artificial Intelligence".

About the event:

Online webinar dated 14 May 2020 with mentor Mr. Manish Rana, *KVCH instructor* delivered a talk on the "Artificial Intelligence". In total 50 students from the department attended the online workshop.

The session started with introduction to python with some practice questions. The instructor discussed how the various libraries of python can by used such as numpy, pandas etc. There was explanation given for the functions used from the libraries.

The instructor gave a brief about the data visualization techniques and the various components that can be used in analysing data. Libraries related to data visualization were discussed and a demonstration was given.

An explanation about the supervised and unsupervised learning was given. Doubts were taken regarding python and the libraries used. Text Analytics and text mining was discussed and the procedure to implement these were given. An introduction to NLU(Natural language understanding) and NLP(Natural Language Processing) were covered.

The overall webinar gave an introduction for Artificial Intelligence so that students would know how to pursue it. It touched all topics related to the subject.
