ADMISSIONS OPEN 2025-26

APPLY NOW

LAST DATE TO REGISTER FOR PU-CET(PG) 26 MAY,2025

Courses Offered

Master of Computer Applications M.C.A.2-Year Course and M.C.A. (Self-Financing) 2-Year Course

Eligibility Conditions

The minimum qualification for admission to the first Year of the course shall be:

1. A recognized first degree of minimum three Years' duration in any discipline with at least 50% marks(**) and with Mathematics at 10+2 or at graduation level (all three Years); Or

2. B.C.A. from Panjab University with 50% marks (**)Or

3. B.Voc. (Software Development), B.Voc. (Hardware and Networking) & B.Voc. Multimedia (Graphics & Animation) with at least 50% marks (**) and with Mathematics at 10+2 level. Or

Any examination recognized by the Panjab University Chandigarh as equivalent to any of the above examination (1), (2) or (3).

** 5% concession is admissible in eligibility requirement to SC/ST/BC/PwD candidates.

Scheme of Test

The test of 1 hour 30 minutes duration shall contain 75 Objective Type (Multiple choice questions with four responses i.e. A, B, C, & D) carrying one mark each.

The questions will be based upon following four components:

	Component	No. of Questions
1	Computer Science	Questions based on Computer Science = 60% (basic concept of C, Data Structure, Software Engineering, Operation System, Computer Architecture, Object Oriented Programming, Algorithm Analysis and Database Management System)
2	Mathematics (10+2 level)	Questions based on Maths= 20% (10+2 level)
3	General Aptitude Test	Questions based on General Aptitude Test=20%

M.Sc. Computer Science (Specialisation in Data Science)

under the framework of Honours School System

Eligibility Conditions

BCA/ B.Sc. (Honours) (Computer Science / Information Technology / Computer Applications)/ B.Tech. (Computer Science / Computer Engineering / Information Technology) / B.E. (Computer Science/ Computer Engineering / Information Technology) / B.Sc. (General) with Computer Science / Information Technology / Computer Applications as an elective subject / B.Sc. (Maths and Computing) / B.Voc. [Software Development / Hardware and Networking / Multimedia (Graphics and Animation)] or any other examination recognized as equivalent with 50% marks thereto.
5% concession is admissible in eligibility requirements to SC/ST/BC/PwD candidates.

Scheme of Test

The Entrance Test will be of 75 marks. It will be of 1 hour 30 minutes duration consisting of 75 multiple choice questions of Computer Science subject at the level of examinations as mentioned in the eligibility conditions.

Environment Club Leads Cleanliness Drive Under Swachh Bharat Abhiyaan

Environment Club of DCSA, Panjab University organized a cleanliness drive coordinated by Dr. Anuj Kumar, under Swachh Bharat Abhiyaan on March 5th, 2025. The Environment Club led the cleanliness drive, aiming to promote hygiene and environmental awareness among students and faculty members. Volunteers from the Environment Club, along with other participants, came together to clean the parking area and its surrounding spaces within the DCSA campus. The drive was a collaborative effort to foster a sense of responsibility toward maintaining cleanliness in the university's public areas. The volunteers enthusiastically collected waste, ensuring that the area was left pristine. The event not only contributed to the cleanliness of the campus but also reinforced the importance of sustaining a cleaner, healthier environment. The success of the drive highlighted the commitment of the university community towards the Swachh Bharat mission.

-Ishneet Kaur MCA-I(M)

DCSA Students Shine at MCM DAV IT Fest 2025

The Department of Computer Science and Applications is proud to share the remarkable achievements of our students in the IT Fest, held at MCM DAV College for Women, Chandigarh on March 5th, 2025. Our students participated in various events, showcasing their skills and knowledge in the field of Information Technology, and we are thrilled to announce their outstanding performances, with many securing top positions and exciting prizes.

Joskaran Singh and Shivam Jerath from MCA-I(Morning) participated in the IT Quiz and secured the first prize with their excellent performance, demonstrating their vast knowledge in the field. Rajbir Singh from MCA-I(Evening) and Nupur from MCA-I(Morning), competing in the Debugging event, earned the third prize, with their problem-solving skills. Sayak Biswas and Nancy from MCA-I(Evening), won the first prize in the Research-Based Poster Presentation on "Air Drawn Mathematical Expression Recognition", where they creatively and effectively presented their research. In the Movie Making event, Sachin Dogra and Angellina Gill from MCA-I(Evening), captured the first prize with their innovative approach to movie-making. Arshpreet Kaur and Richa from MCA-I(Morning) participated in the Web Designing event, earning second prize with their creative and user-friendly design.

Our students' participation and achievements at the MCM IT Fest were a testament to their hard work, dedication, and talent in the field of IT. We are incredibly proud of their success and look forward to even more achievements in future events. Congratulations to all the winners, and thank you for representing the department with excellence!

-Ishneet Kaur MCA-I(M)

Technology & Tomorrow: A Vision Shared by Dr. Vijay Kumar Mago

On March 6th, 2025, our department had the privilege of hosting Dr. Vijay Kumar Mago, Associate Professor and Chair at the School of Health Policy and Management, York University, Canada, as a part of our Expert Talks series. The event was coordinated by Prof.(Dr). Sonal Chawla, with Dr. Anuj Sharma as the Chairperson, and Mrs. Anjali Jindia as the Co-coordinator. The student coordinators for the event were Jai M.Sc.-I (Data Science), Twinkle MCA-I (Morning), and Nancy MCA-I (Evening).

The event commenced with a warm welcome from Chairperson Dr. Anuj Sharma, who introduced Dr. Vijay Kumar Mago to the students. Following this, Prof. Sonal Chawla and Dr. Rohini Sharma presented Dr. Mago with an award of appreciation in recognition of his expertise and contribution to the field. Dr. Mago delivered an insightful speech, focusing on the role of technology in shaping the future and sharing valuable information about his York University.

After Dr. Mago's talk, the students had the opportunity to engage with him through a question-and-answer session, where they interacted with him and sought answers to various queries related to technology and higher education. The event concluded with a vote of thanks delivered by Mrs. Anjali Jindia, who expressed gratitude to Dr. Mago for his participation and to everyone who contributed to making the session a success. The event was highly informative and left the students with a deeper understanding of the intersection between technology and education.

-Ishneet Kaur MCA-I(M)

Code, Collaborate, Conquer: DCSA Shines at NIT Trichy's Tech Fest

The Department of Computer Science and Applications (DCSA), Panjab University, Chandigarh, actively participated in Version'25, the annual technical fest organized by NIT Trichy, held from March 7th, 2025 to March 9th, 2025. DCSA students demonstrated remarkable talent, teamwork, and competitive spirit, achieving notable success in various events.

Several students engaged in high-stakes coding challenges designed to test their logic, problem-solving, and algorithmic skills. These included "Code Reboot," a unique challenge focused on reverse-engineering and optimizing code, and "Algo Arena," a 1-hour 30-minute coding battle.

Beyond competitions, students also participated in workshops such as the Low-Code Workshop, where Shreya Dhingra MCA-I (Evening), Vinita Arya MCA-I (Morning), Kashish Dhamija MCA-I (Morning), Disha Gupta MCA-I (Morning), Aman Sahu MCA-I (Morning), Aman Kumar MCA-I (Morning), Aditya Sharma MCA-I (Evening), and Saakshat MCA-I (Evening) explored rapid application development.

DCSA students excelled in the Treasure Hunt, showcasing problem-solving skills, collaboration, and strategic thinking. Team D.I.S.C.C, comprising Aman Sahu, Aman Kumar, Aditya Sharma, and Saakshat, secured the first position.

In the "Pitch to Rich" business proposal event, DCSA students impressed with their innovative thinking. Team Ustaad Ji, comprising Shreya Dhingra, Vinita Arya, Disha Gupta and Kashish Dhamija, presented their idea—the PGVG Application—and secured the second position. Their structured pitch and entrepreneurial insight earned praise from the judges.

Participating in Version'25 at NIT Trichy was an enriching and unforgettable experience for the students of DCSA. The fest provided a dynamic platform to test their skills, challenge their creativity, and engage in healthy competition with peers from across the country. Whether it was through intense coding battles, innovative business pitching, or immersive workshops, students found themselves stepping out of their comfort zones and gaining real-world insights into the field of technology. Beyond the wins and accolades, it was an experience that not only boosted their confidence but also strengthened their passion for IT and innovation.

- Kashish MCA-I(M)

Bottle feeder creation (ENVIRONMENT CLUB EVENT)

On March 10th, 2025, the Environment Club of the Department of Computer Science and Applications (DCSA) organized the Plastic Bottle Bird Feeder initiative under the coordination of Dr. Anuj Kumar and Mr. Rishab Batra. The event aimed to support the local bird population by providing food and water through feeders crafted from recycled plastic bottles.

Anisha Sharma, Shifali Gautam, Parneet Kaur, Aastha, and Mehak Verma from MCA-I (Evening) led the bottle feeder-making activity, with enthusiastic participation from other club members. The feeders were installed across the campus, ensuring easy access for birds and promoting sustainability.

This initiative not only contributed to wildlife conservation but also raised awareness about the importance of recycling and environmental responsibility among students. The Environment Club remains committed to conducting similar activities to protect and preserve nature.

-Nancy MCA-I(E)

72nd Annual Convocation of Panjab University

The 72nd Annual Convocation of Panjab University took place on March 12th, 2025. It was a moment of immense pride for our department as several of our students were honored for their outstanding performances. The top rankers from the MCA (3-year) program — Akanksha Kohli, Anmol Kaur, Akshit, Varun, and Ramita — were recognized for their exceptional achievements. Additionally, Dhiraj Yadav, Rajat Kumar, and Akansha Pahwa from the MSc. Computer Science (specialization in Data Science) (2-year course) were also acknowledged for their academic excellence. Akshit from the MCA (3-year) program and Akansha from the MSc. Computer Science (specialization in Data Science) (2-year) program were awarded the prestigious Gold Medal for their exceptional academic excellence.

The convocation also celebrated the accomplishments of PhD scholars who were awarded their doctoral degrees after completing their rigorous research. The scholars recognized during this ceremony included Lalita Kumari, Supreet Thapar, Balwinder Kaur, Anil Kumar, Shakti Kumar, Silky Sachar, Monika Sethi, Dipiti Watna, Ramanpreet Kaur and Jaswinder Singh, each of whom made significant contributions to their respective fields of study.

The presence of Smt. Droupadi Murmu added a special touch to the occasion, inspiring students and scholars alike to continue pursuing excellence. We extend our heartfelt congratulations to all the awardees for their brilliant achievements and wish them continued success in their future endeavors.

- Ishneet Kaur MCA-i(M)

Special Session on "AI for Entrepreneurship"

The Department of Computer Science and Applications (DCSA), in collaboration with the Training and Placement Cell, organized a special session on "AI for Entrepreneurship" on March 21st, 2025, aimed at empowering the next generation of entrepreneurs with AI-driven innovation. This event was coordinated by the Training and Placement Cell of the department.

Dr. Anuj Kumar and Dr. Kavita Taneja , TPC Co-ordinators, warmly welcomed the guest speakers, Mr. Manas Mohan, Head of the Anvarat Foundation, and Dr. Naveen Aggarwal, Professor at UIET, Panjab University, Chandigarh, who shared their knowledge and experience in the field of AI and entrepreneurship.

Mr. Manas Mohan began the event by providing an overview of how AI is reshaping business models and creating new opportunities for entrepreneurs. After his address, he handed over the mic to Dr. Naveen Aggarwal, who briefly explained the session's objectives and shared insights on the entrepreneurial mindset needed to leverage AI for business success. He also clarified its practical applications in entrepreneurship.

The session was well-received by the students, who actively participated throughout. All students engaged with the speakers by asking questions and sharing their thoughts. At the end of the session, all participants were awarded e-certificates for their participation.

The event concluded with a vote of thanks, expressing gratitude to the guest speakers and all the students for their active involvement in making the session a success. It provided participants with valuable learning opportunities and equipped them with the knowledge to utilize AI in their future entrepreneurial ventures.

- Ishneet Kaur MCA-I(M)

Prof. (Dr.) Sonal Chawla Appointed as Director (Additional Charge), Dr. APJ Abdul Kalam Computer Centre, PU

We are delighted to share that Prof. (Dr.) Sonal Chawla, from the Department of Computer Science and Applications, Panjab University, Chandigarh, joined on March 25th, 2025 as the director of Dr. APJ Abdul Kalam Computer Centre, PU (Additional charge). The previous director, Prof. Anu Gupta, officially handed over the charge to Prof. Sonal Chawla.

Prof. Chawla is a renowned academician, an avid researcher, and a dynamic administrator. She has been honored with the prestigious AICTE Career Award and has made impactful contributions to both national and international research publications. In addition to her academic excellence, she has previously held several key leadership roles at Panjab University, including Chairperson of the Department of Computer Science and Applications and Honorary Director of the Centre for IAS Studies. Her efforts in digitisation at PU have been widely recognized.

DCSA heartily congratulates Prof. Sonal Chawla on her new role.

- Ishneet Kaur MCA-I(M)

Victories at PGGCG-11: Celebrating Innovation and Talent

On April 2nd, 2025, students from our department participated in an IT Fest hosted at Post Graduate Government College for Girls, Sector 11, Chandigarh. Our students showcased remarkable talent and brought laurels to the institution

Nayan M.Sc.-I (Data Science) and Jatin Garg MCA-I (Morning) participated in the Coding and Debugging competition and secured the Second Prize, demonstrating their excellent problem-solving and programming skills.

Tanisha M.Sc.-I (Data Science) and Nishta Gilhotra MCA-I (Evening) showcased their creativity and innovation in the Best Out of Waste competition and won the Second Prize, highlighting their eco-conscious mindset and artistic abilities.

We congratulate all the winners for their outstanding performance and wish them continued success in future endeavours.

- Sargundeep Singh MCA-I(M)

Tech Utsav 2k25 - Inter-college Tech Fest Organized by DCSA

On April 4th, 2025, the Department of Computer Science and Applications, Panjab University organized an inter-college level Tech Utsav 2k25, a vibrant and intellectually stimulating event led by the cultural team under the guidance of coordinator heads Dr. Jasleen Kaur Bains and Dr. Balwinder Kaur, along with the enthusiastic cultural team members, who were a team of energetic and dedicated students from MCA and MSc. Data Science. Tech Utsav 2025 aims to provide a platform for students to explore and showcase their skills in various domains of technology, innovation, and creativity.

The day began with registrations where participants from various colleges registered their entries for the competitions. The inauguration ceremony began at 10:00 AM.

The ceremony was graced by the presence of the department Chairperson Dr. Anuj Sharma, esteemed professors, faculty members and the students from different institutions. The inauguration began with a warm welcome speech, followed by the Panjab University anthem, and the traditional lamp-lighting ceremony conducted by the Chairperson and faculty members. A heartfelt two-minute silence was observed in remembrance of Aditya Thakur.

Dr. Anuj Sharma, the Chairperson of the department, addressed the gathering with an inspiring speech. He welcomed the students and highlighted the importance of technical fests like Tech Utsav in the academic environment. He also briefed the audience about the various activities and achievements of the department and shared insights on the admission process. Dr. Jasleen Kaur Bains, as the cultural team coordinator head, also welcomed the participants and elaborated on the essence of Tech Utsav.

Tech Utsav 2k25 featured a diverse range of competitions that challenged participants' technical knowledge, creativity, and teamwork. These included Coding & Debugging, Website Making, Logo Designing, On-the-spot Powerpoint Presentation Making, Advertisement Creation, Quiz, Poster Making, and Typing Test.

Following the inauguration, the participants were informed about the venue and schedule of each competition. All events were coordinated smoothly by the cultural team and volunteers, ensuring efficient management throughout the day.

The Coding & Debugging competition saw 9 teams, each comprising 2 students. Held from 10:30 to 11:30 AM, the event was judged by Mr. Karan and Mr. Ujjwal and coordinated by Nayan and Jatin, with volunteers Sayak, Aditya, and Sargundeep Singh. It consisted of two rounds: a non-elimination MCQ round on C and C++, and a second round involving pattern-based coding problems. Tools allowed included VS Code with MinGW, Dev C++, and Turbo C.

Website Making had 8 teams of 2 members each, running from 10:30 AM to 12:00 PM. Judged by Prof. Indu Chhabra and Ms. Vaishali Mehta, and coordinated by Jai and Pulkit with volunteers Arsh Divya, Shriya, and Shria, participants had to design a virtual city using HTML, CSS, and JavaScript. They were given 15 minutes to download necessary media and 1.5 hours for development, judged on coding and presentation.

In Logo Making, 7 students participated, held from 10:30 to 11:30 AM. Dr. Kavita Taneja

and Ms. Kamakshi Pundhir judged. The event was coordinated by Tanisha and Madiha, with Jai and Aditi volunteering. Participants used Inkscape to design logos and taglines for a "luxury fashion brand (phygital fashion)," with evaluation criteria focused on creativity, uniqueness, and design.

On-the-spot PPT Making had 8 teams, each with 2 students, running from 10:30 AM to 1:00 PM. Topics were provided on the spot, and teams chose one from: Space Internet and Starlink, Neural Implants and the Brain, or AI in Wars. Judged by Dr. Jasleen Kaur Bains and Dr. Supreet Thapar, coordinated by Sahil with Meenu and Dilreet as volunteers, participants had 25 minutes to create, 5 minutes to present, and 2 minutes for Q&A.

Advertisement Creation featured 8 teams competing from 10:30 AM to 12:30 PM. Judged by Dr. Anuj Sharma and Prof. Anu Gupta, the event was coordinated by Lavanya with volunteer Nishta. Participants created video ads themed "AI Revolution" and were evaluated based on creativity, originality, clarity, editing, jingle, and narrative.

The Quiz competition involved 10 teams of 2 students, held from 11:30 AM to 1:00 PM. Topics spanned IT, current affairs, and general knowledge. Judged by Dr. Kavita Taneja and Dr. Balwinder Kaur, the event was coordinated by Harkirat with volunteers Shivam, Nancy, and Mehak. It consisted of an elimination round followed by a final round among the top 5 teams.

Poster Making had 8 individual participants from 11:00 AM to 12:30 PM. Judged by Prof. Sonal Chawla and Ms. Anjali Jindia, the theme was "Viksit Bharat" with the topic "Digital and Green India." The event, coordinated by Tanisha and Madiha with volunteers Ishneet Kaur and Parmpreet Kaur, was judged based on creativity and message.

The Typing competition started at 12:30 PM with 7 students. Coordinated by David A. Haro with volunteers Twinkle and Vinita, it consisted of two rounds: a 3-minute test and a 9-minute full-page typing round, with combined results determining the winners.

After all competitions concluded, refreshments were served to participants, volunteers, and coordinators. The award ceremony began at 2:30 PM, graced by chief guests Mr. Chavi Jindal, founder of Innowill, and alumnus Mr.Deep Bansal. After a warm welcome and appreciation awards for the chief guests, they addressed the

students, encouraging active participation in such enriching events. The chairperson, chief guests, and teachers then awarded the winners. The prize distribution recognized the outstanding performers across all competitions. In the Coding & Debugging event, the first prize was awarded to Akhil Samwal and Neeraj Rana (PGGC - 11), followed by Rayna Nayyar and Himanshi Devgun (MCM DAV - 36) in second place, and Rishab and Parneet (DCSA, PU Chd) securing the third position. For the Website Making competition, Prince Kumar and Piyush Chhabra (PGCCBA - 50) claimed the first prize, with Ashmeet Kaur and Jyotsna Sabharwal (MCM DAV - 36) coming in second, and Rahul and Adarsh (PGGC - 46) in third place. In the Logo Making event, Rakesh Gulati (GGDSD - 32)emerged as the winner, followed by Shubh Rathi (CGC Landran) in second place and Mohd. Aadil (UIMS, PU Chd) in third. The Powerpoint presentation Making competition saw Mehakmeet Kaur and Akriti (MCM DAV - 36) taking the first position, while Himani and Nupur (DCSA, PU Chd) secured the second position, and Alvina Paul and Mayank Sobti (GCCBA - 50) earned third position.

In the Advertisement event, the first prize went to Rahul Kumar Sharma and Ritik Pandey (SGGSC 26 Co-ed), with Shalika Sooden and Harpreet Kaur (Chandigarh University) finishing second, and Sambhav Pathak and Vikramjit Singh (GGDSD - 32) in third place. The Quiz competition was won by Jaskaran Singh and Kriti Aggarwal (DCSA, PU Chd), followed by Nitish and Ayush (PGGC - 46) in second place, and Isha Saklani and Jyoti Khetwal (CGC Landran) in third. In Poster Making, Simran (Dev Samaj - 45) secured the first position, Komal (PGGC - 11) the second, and Ishita (GCCBA - 50) the third. Lastly, in the Typing competition, Gurmukh Singh (DCSA, PU Chd) secured first position, Tamanna (MCM DAV - 36) came in second, and Sourabh Tiwari (SGGSC - 26 Co-ed) took third place.

After the prize distribution, Dr. Jasleen Kaur Bains and Dr. Balwinder Kaur expressed heartfelt gratitude to the entire team and volunteers, appreciating the seamless coordination, management, and spirit that led to the event's resounding success. The day concluded with group photographs of the winners, chief guests, chairperson, and teachers.

The organizing team included cultural members from MCA-I [Morning] - Sahil Sharma, Jatin Garg, and David A. Hora; MCA-I [Evening] - Pulkit, Harkirat, and Lavanya; and M.Sc.-I Computer Science (Specialization in Data Science) - Nayan, Tanisha, Madiha, and Jai. Volunteers played key roles: in photography – Abhishek Kamboj and Rohit;

anchoring – Dilreet Kaur, Meenu, Sargundeep Singh, Arsh Divya, and Nancy; decoration – Ishneet Kaur and Pampreet Kaur; management – Shivam, Twinkle, Suraj, and Vinita; hospitality – Sparsh; and others – Aditi, Shria, Sayak, Aditya, Mehak, and Shriya.

The Tech Utsav 2K25 concluded on a high note, achieving all expectations with great enthusiasm, flawless organization, and cherished memories.

– Ishneet Kaur MCA-I(M)

"Clean Campus, Green Future": Earth Day Cleanliness Drive at StuC

To mark the occasion of World Earth Day, a special cleanliness drive was organized on April 22nd, 2025 at the Student Centre (StuC). The initiative was aimed at promoting environmental awareness, encouraging responsible waste management, and inspiring students to take active ownership of their surroundings.

The drive was led by Dr. Anuj Kumar and Mr. Rishab Batra, who played a key role in motivating and guiding the participants throughout the activity. Under their leadership, student volunteers worked together to clean multiple areas around the Student Centre, including the open seating spaces, walkways, and green zones. The team emphasized proper waste segregation, with recyclables and non-recyclables collected separately to ensure responsible disposal.

Beyond just cleaning, the event fostered a strong sense of community and environmental consciousness. Students engaged in meaningful discussions about sustainability, plastic reduction, and the long-term impact of everyday actions on the planet. The drive also highlighted the importance of maintaining cleanliness not only as a routine but as a shared duty toward a healthier campus and a better future.

This Earth Day event was a powerful reminder of the difference we can make through collective effort. A heartfelt thanks goes out to everyone who contributed their time and energy to this successful initiative.

- Nancy MCA-I(E)

The Online Session from VDOIT

The Department of Computer Science and Applications (DCSA), Panjab University, training and placement cell successfully organized a special online session titled "Igniting Innovation with AI, Data Science, and AIML Excellence" on 23rd April, 2025, in collaboration with experts from VDOIT.

The session aimed to empower students and aspiring entrepreneurs by highlighting the transformative potential of Artificial Intelligence and Machine Learning in driving future innovations and shaping industries. The event provided a platform for knowledge exchange and engagement with real-world applications of emerging technologies.

Esteemed guest speakers Mr. Satvik Kharb and Mr. Siddharth Gupta shared their expert insights, offering participants a deep dive into current trends, practical implementations, and the future trajectory of AI-driven solutions. Their presentations were followed by an interactive Q&A session that saw enthusiastic

participation from attendees, fostering a rich discussion on AI's evolving landscape.

The event proved to be an inspiring and informative experience, sparking curiosity and encouraging the next generation of innovators to explore the endless possibilities in the field of AI, Data Science, and AIML.

- Ishneet Kaur MCA-I(M)

Session On IT Industry Trends

On April 24th, 2025, The Department of Computer Science and Applications (DCSA), Panjab University, organized an engaging session on "Industry Trends and Innovations." The event featured Mr. Chavi Jindal, Founder of Innowli Apps and DCSA alumnus, and Mr. Yash Kaushik, Software Engineer and UIET alumnus. Mr. Jindal shared his entrepreneurial journey and emphasized that adaptability, awareness, and strong technical skills like C++, DSA, and problem-solving are key to thriving in today's rapidly evolving tech industry.

Mr. Kaushik provided insights into current hiring trends and employer expectations. He highlighted the importance of practical skills, GitHub portfolios, and open-source contributions, while also encouraging students to use LinkedIn strategically and to research companies thoroughly before applying. His interactive session addressed student queries related to internships, industry readiness, and skill-building.

Both speakers underlined the critical role of resume building, API development knowledge, and hands-on experience through internships. The session concluded with a token of appreciation from Dr. Anuj Sharma, Chairperson DCSA to the invited speakers. The session served as an initiative to strengthen the Industry Academia bond. It inspired the students to be better prepared for their professional journeys.

- Jaskaran Singh & Ishneet Kaur MCA-I(M)

Expert talk on AI and Machine Learning by Dr. Anuj sharma

On March 3rd, 2025 at SD College, Chandigarh, Dr. Anuj Sharma delivered an expert talk on "AI and Machine Learning." Dr. Anuj Sharma was warmly welcomed by the college community, including students and faculty, who were eager to gain insights into these advanced and rapidly developing fields.The session was designed to provide valuable insights into the concepts and applications of Artificial Intelligence and Machine Learning.He shared his deep knowledge of how these technologies are transforming industries such as healthcare, finance, and technology, and discussed their growing significance in today's world.

The talk also focused on emerging trends in AI and Machine Learning, along with their potential impact on future career opportunities. An engaging Q&A session followed, where students had the chance to interact with Dr. Anuj Sharma, ask questions, and gain a deeper understanding of the subject matter. The event proved to be both informative and inspiring, sparking students' interest in exploring the vast possibilities within AI and Machine Learning, and encouraging them to pursue further learning in these dynamic fields.

- Ishneet Kaur MCA-I(M)

Dr. Anuj Sharma Graces MCM IT Fest as Chief Guest

On March 5th, 2025, Dr. Anuj Sharma acted as the Chief Guest at MCM DAV College for Women, Chandigarh, to attend the much-anticipated IT Fest. Dr. Sharma was warmly welcomed by the faculty, staff, and students of the college, who were excited to have him at the event.

During the inaugural ceremony, Dr. Sharma delivered an insightful speech on the significance of Information Technology in today's rapidly advancing world. He emphasized the importance of staying updated with the latest technological trends and how emerging fields like Artificial Intelligence and Machine Learning are shaping the future. His words inspired students to explore and innovate in the field of IT.
In addition to his speech, Dr. Sharma also had the honor of presenting prizes to the winners of various competitions held during the fest. His presence and encouragement added a special touch to the event, motivating students to continue pursuing excellence in the field of technology.

- Ishneet Kaur MCA-I(M)

Expert Talk on Cyber Security by Dr. Anuj Sharma

On March 11th, 2025, Dr. Anuj Sharma, acted as a keynote speaker to address an expert session on "Cyber Security and Safety", conducted under the Capacity Building Programme initiated by CBSE in Panchkula. The event witnessed participation from educators, IT coordinators, and academic leaders from various institutions.

During the session, Dr. Sharma shed light on the evolving landscape of digital threats and underscored the significance of cultivating cyber-safe practices within educational settings. He articulated the necessity of being vigilant in the virtual space and advocated for a proactive approach in safeguarding sensitive information.

The discussion encompassed a wide array of topics including secure browsing habits, multi-factor authentication, social engineering attacks, data privacy, and responsible digital citizenship. Dr. Sharma enriched the dialogue with illustrative case studies, which brought clarity to the complex nature of cyber vulnerabilities and highlighted practical mitigation strategies.

The programme successfully bridged theoretical knowledge with everyday applicat-

ion, leaving attendees better equipped to promote a secure online environment. The department acknowledges Dr. Sharma's valuable contribution and applauds his commitment to enhancing digital awareness through such impactful engagements.

- Nancy MCA-I(E)

Expert Insight into AI: Prof.(Dr.) Sonal Chawla's Session at PGGCG Workshop

On March 20th, 2025, Prof.(Dr.) Sonal Chawla, Professor, Department of Computer Science and Applications at Panjab University, Chandigarh, joined as a resource person for a five-day workshop on Artificial Intelligence at Post Graduate Government College for Girls (PGGCG), Sector 11, Chandigarh.

During her session, Prof. Chawla shared her expertise on foundational concepts, real-world applications, and the future of Artificial Intelligence. Her talk was both insightful and engaging, offering participants a fresh perspective on how AI is shaping various industries and academic disciplines.

The session was well-received by both students and faculty, who found her approach informative and inspiring. Prof. Chawla's presence added immense value to the workshop, encouraging participants to explore AI with renewed curiosity and confidence.

- Sargundeep Singh MCA-I(M)

Dr. Anuj Sharma Delivers Inaugural Address at National Seminar on Artificial Intelligence

On March 21st, 2025, Dr. Anuj Sharma delivered the inaugural address at the National Seminar on "Artificial Intelligence for Global Good: Social, Economic, and Business Transformation" organized by the University of Business School (UBS), Ludhiana.

The seminar brought together scholars, industry experts, policymakers, and academicians from across the country to discuss the transformative potential of Artificial Intelligence in addressing contemporary challenges. Dr. Sharma's address set a compelling tone for the event as he explored the wide-ranging applications of AI in reshaping global systems and driving inclusive development.

During his talk, Dr. Sharma emphasized the importance of aligning AI innovation with ethical frameworks to ensure technology serves the greater good. He highlighted successful case studies where AI has been instrumental in improving public services, enhancing business efficiencies, and enabling social impact.

His insights not only underscored the urgent need for responsible AI governance but also inspired meaningful dialogue among the participants. His participation in such forums reflects the department's commitment to fostering research-driven solutions for societal advancement.

- Nancy MCA-I(E)

Prof. (Dr.) Sonal Chawla Invited as Chief Guest at NMIMS Chandigarh Hackathon Inauguration

Prof. (Dr.) Sonal Chawla, Director, APJ Abdul Kalam Computer Center and Professor, Department of Computer Science and Applications (DCSA), Panjab University, Chandigarh, acted as the Chief Guest for the inaugural ceremony of the Thirty-Hour Hackathon organized by NMIMS Chandigarh on April 4th, 2025.

The invitation recognized Prof. Chawla's significant contributions to the field of Computer Science and her continued commitment to promoting academic excellence and technological innovation. In her keynote address, Prof. Chawla encouraged participants to embrace creativity, collaboration, and ethical practices in problem-solving — setting a motivational tone for the event.

Her presence and address were deeply appreciated by the organizers and

participants, reinforcing the value of academic-industry collaboration and mentorship. Events like these highlight the far-reaching impact of faculty from Panjab University in shaping and supporting innovation beyond the campus.

The Department of Computer Science and Applications extends its congratulations to Dr. Sonal Chawla on this recognition and acknowledges her valuable role in representing Panjab University on distinguished platforms.

Empowering Educators with AI: Dr. Anuj Sharma's Session at CBSE Capacity Building Programme

On April 5th, 2025, Dr. Anuj Sharma served as a resource person in the CBSE Capacity Building Programme held in Panchkula. The focus of the session was on the "Use of Artificial Intelligence (AI) in Education".

Dr. Sharma shared his insights on how AI technologies are transforming the educational landscape. He discussed various applications of AI in personalized learning, intelligent tutoring systems, and data-driven decision-making in education.

The program was attended by educators and administrators from various CBSE-affiliated schools. Dr. Anuj Sharma's contribution to the session significantly supported the objective of the capacity building programme—empowering educators with emerging tools and techniques for 21st-century teaching.

From Campus to Cockpit: Pushpinder Singh Selected as Flying Officer

The Department of Computer Science and Applications, Panjab University, Chandigarh, takes great pride in congratulating Mr. Pushpinder Singh, a student of MCA 4th Semester, on his prestigious selection as a Flying Officer in the Indian Air Force.

This remarkable achievement reflects Pushpinder's unwavering determination, discipline, and commitment to excellence. His journey stands as an inspiring example of how academic dedication, combined with personal courage and ambition, can lead to distinguished and honorable accomplishments.

His selection is not only a personal milestone but also a moment of immense pride for the department and the university community as a whole.

The department extends its heartfelt wishes to Mr. Pushpinder Singh for continued success and fulfillment as he embarks on this noble and commendable path of serving the nation.

Victory Beat: Lovesh Kalra Shines at Kaladhara 2025

We are proud to share that Lovesh Kalra, a student of MCA-I (Evening), showcased exceptional talent and clinched the First Prize in Beatboxing at Kaladhara 2025, an inter-college cultural fest organized by UM Thapar School of Management.

The event took place on March 29th, 2025, drawing participants from various colleges across the region. Amidst stiff competition, Lovesh impressed the judges and audience alike with his rhythmic precision, creativity, and stage presence, ultimately emerging as the winner.

His remarkable performance not only reflects his dedication and passion for music but also brings great pride to our department. We congratulate Lovesh on this well-deserved achievement and wish him continued success in all his future endeavors.

AIKosh: Empowering AI Learning and Innovation

Artificial Intelligence (AI) is transforming industries, and access to the right resources is essential for learning and innovation. AIKosh, a platform under the IndiaAI initiative, is designed to democratize AI education by providing easy access to datasets, models, toolkits, and development environments. Whether you are a student, educator, or professional, AIKosh offers a comprehensive hub for hands-on learning and AI application development.

AIKosh features a vast library of datasets across various sectors such as agriculture, healthcare, and climate science. These high-quality, curated datasets form the foundation for building effective AI models. The platform also provides pre-trained models and toolkits, allowing learners to experiment without starting from scratch. With AIKosh, users can quickly dive into machine learning and AI development, enhancing their learning experience.

One of the standout features of AIKosh is its AI sandbox environment, which lets users test and deploy models directly on the platform. This hands-on environment fosters practical learning and helps learners better understand AI concepts. Additionally, the Use Case Library showcases real-world AI applications, offering inspiration and insights into how AI is applied in various industries. This resource helps learners see the broader impact of AI and encourages them to create their own innovative solutions.

For students, AIKosh serves as a perfect tool for academic learning, providing datasets, models, and tutorials that align with academic curriculums. Educators can integrate AIKosh into their courses, enhancing classroom learning with real-world AI tools. For professionals and researchers, AIKosh offers a platform to continue skill development and stay updated on the latest AI advancements.

Smart Clouds for Smarter AI: Optimizing LLM Workloads in the Cloud

Exploring adaptive cloud infrastructure strategies to support Large Language Models efficiently

The proliferation of AI-driven applications, particularly Large Language Models (LLMs) like ChatGPT and Claude, has dramatically increased the demand for computational resources. Modern AI applications in natural language processing, computer vision, and speech recognition require not only sophisticated algorithms but also robust and intelligently managed infrastructure. As cloud platforms become the preferred environment for deploying and scaling these models, efficient resource allocation for these LLM workloads becomes not just a performance issue but a necessity for scalability, cost-efficiency, and energy conservation [1].

As a result, Cloud providers such as Amazon Web Services (AWS), Microsoft Azure, and Google Cloud Platform (GCP) are integrating AI-specific hardware into their infrastructure to accommodate the massive compute needs of LLMs and deep learning workloads.

These include:

- AWS Inferentia & Trainium: Custom-built chips for deep learning with Inferentia designed for inference and Trainium for training [2], [3].
- Google TPUs (Tensor Processing Units): Optimized for large-scale AI computations [4].
- Azure ML & ND-series VMs: Provide GPU-accelerated computing for AI and ML applications [5].

These advancements bring immense processing power to the cloud. However, simply using these services isn't enough — optimizing their use becomes the next frontier. Resource allocation for LLMs is not just about CPU or GPU availability— it's about intelligently distributing memory, bandwidth, storage, and compute cycles to reduce costs, training time, and energy consumption.

These challenges open fertile ground for research in cloud resource optimization to build more sustainable, cost-effective, and intelligent cloud platforms that are ready for the next generation of AI systems.

Research Focus:

To tackle the resource allocation challenges posed by these models, researchers are actively proposing and testing several innovative approaches:

- Reinforcement Learning Schedulers that learn optimal VM/GPU configurations based on real-time workload feedback and historical performance data [6].
- AI-aware Autoscalers that predict GPU memory and compute needs requirements to proactively scale cloud resources [7].
- Federated Cloud Scheduling for large AI workloads using geographically distributed resources with privacy-aware mechanisms [8].
- Graph-Based Task Scheduling by Modeling LLM execution as DAGs to optimize parallelism in transformer layers, reducing memory bottlenecks and training time [9].
- Energy-Efficient Model Placement to green data centers or optimizing for carbon-aware scheduling using real-time energy pricing or renewable availability [10].
- Decentralized Resource Brokers using Blockchain or peer-to-peer based coordination mechanisms for distributing LLM workloads in edge-cloud or multi-vendor ecosystems [11].
- QoS-Aware Fairness Mechanisms to ensure fair GPU allocation between concurrent AI jobs with strict SLAs or deadlines without performance interference [12].

These ideas are actively being pursued by industry leaders like Meta, Google DeepMind, and OpenAI, as well as academic labs, which are developing intelligent orchestration layers to optimize the training and deployment of LLMs.

The future of AI and LLMs depends not just on model innovation but on optimizing the ecosystems that power them through smarter scheduling, sustainable deployments, and adaptive resource allocation. Bridging this gap is key to building more efficient, scalable, and environmentally responsible AI systems.
