Department of Computer Science and Applications

Placement Summary **Batch: 2019-2022**

The Training and Placement cell (TPC) of the Department of Computer Science and Applications works in close knitted manner with the student placement representatives from MCA and MSc courses run at the department and the regional centers.

The major objective of TPC is to provide an enriched learning environment for polishing the technical and non-technical skills of the students as well as offering opportunities for internships at leading IT industries for projects and training. The cell conducts workshops in collaboration with the Central Placement Cell of the Panjab University and expert talks with our Alumni and industry experts along with test series and other coding competitions organized by student teams round the clock. This year we upgraded our placement preparations by introducing an informal discussion forum with our specific alumni prior to placement test and interview. Also online learning and evaluation system is organized and practiced by student teams in more regress manner for periodic tests and discussions of latest tools in demand by the industry.

This year over 55 IT companies have participated in the placement marathon and picked over 95% of the total eligible MCA students from the department. Including MCA students of regional centers and M.Sc (Hons) students, the placement figure stands at 81%. The placements record this year has marked the highest package of Rs. 16.6 lacs per annum. Also, one of our 2018-2021 batch alumni has bagged a position in Amazon with Rs. 32 lacs per annum package. The department alumni has maintained a reputation of hard work and persistence in most of the leading IT firms like Infosys, Deloitte, Nagarro, Smart Data, SUFI and many more over the years.

List of Companies offering placements-

1. Agicent Technologies
2. Alaric Ventures
3. American Express
4. Anviam Solutions

42. Relinns Technology
43. Rudra Innovative Software
44. Sapio Analytics
45. Sleepy Classes
46. SmartData
47. Sofster
48. Software AG
49. SUFI
50. Talentelgia Technologies
51. Technofy India
52. ToXSL
53. Truminds Software System
54. vDoIT
55. Webner Solutions
56. Yearbook Canvas
57. Zeversal

Our major challenge with placements of 2019-22 was online mode of most the activities due to pandemic situation. This was overcome with a robust plan and team efforts of our placement cell, our Alumni and CPC PU.

We conducted series of online events like workshops for soft skills, many more mock tests for technical grooming and mock interviews in online mode to enhance the placement performance. We encouraged and guided our batch to do many free online certificate courses from Massive Open Online Courses (MOOC) relevant to current industry demands.

Our students utilized the extra available time due to online mode and were successful in converting the challenges posed by pandemic situation to opportunities for holistic skill enhancement.

Our future vision for the batch 2020-2023 is to involve first year students along with the second year students and final year students in technical and soft skill training from day 1. Another major step we are planning is to have a mentorship programme among the students of final year, second year and first year to build teamwork and awareness for availing projects and internships by our students in off campus mode too.

DEPARTMENT OF COMPUTER SCIENCE AND APPLICATIONS, PANJAB UNIVERSITY, CHANDIGARH

HIGHEST PACKAGE OFFERED FOR SESSION 2021-2022

16.6 LPA

TILL DECEMBER 2021 WITH AVG. PACKAGE OF
