Tech-Infinity 2025: A Showcase of Innovation and Creativity at DCSA

The Department transformed the RUSA Lab into a hub of creativity and innovation on October 31, 2025, by organizing an exciting IT exhibition titled "Tech-Infinity 2025." Conducted under the banner of the IT Club, DCSA, the event aimed to ignite innovation, encourage hands-on learning, and offer first-year students a real-world platform to apply their technical knowledge in solving practical challenges. It served as a launchpad for young minds to explore, experiment, and express their creativity while gaining confidence for future industry roles and placement opportunities. The exhibition stood out for its smooth management, thanks to the tireless efforts of Dr. Jasleen Kaur Bains and Dr. Rohini Sharma, whose thoughtful supervision and structured coordination shaped every part of the event.

The event featured 11 students, who showcased their innovative and problem-solving projects before faculty members and peers.

List of Participants and Their Projects:

Kashish Arora (MCA-I [M]) – **"VetTrack AI"**

A smart animal health tracking system developed using Python, Flask, and Machine Learning. It helps pet owners and veterinarians monitor vaccination schedules and detect early symptoms of common diseases.

Akriti Thakur (M.Sc.-I [Data Science]) – "Multi-Disease Prediction System"
Built using Python, TensorFlow, and Streamlit, this project predicts multiple diseases based on user symptoms, offering an accessible and AI-powered health assessment tool.

Rajat Kumar (MCA-I [M]) – "Java Brick Breaker Game"
A fun and interactive arcade-style game created using Java and Swing, showcasing creativity and understanding of core programming concepts and GUI design.

Osheen Garg (MCA=I [M]) – "Online Ice Cream Store"
A full-stack e-commerce platform designed using HTML, CSS, JavaScript, and PHP, allowing users to customize and order ice creams online with an interactive interface.

Ronak Sood (MCA-I [E]) – "E-Comm Application"
An online marketplace built using React.js and Node.js, focusing on user-friendly navigation, product categorization, and secure payment integration.

Aditi Sukhija (MCA-I [E]) – "Debt Detox"
A finance management app developed using Flutter and Firebase, aimed at helping users manage debts and track financial health efficiently.

Ratan Gulati (MCA-I [M]) – "Code Editor Pro"
A lightweight coding environment built using Electron.js and JavaScript, designed to assist developers with syntax highlighting, auto-completion, and debugging tools.

Anuj Rawat (MCA-I [M]) – "BookHub"
A digital library management system created with PHP and MySQL, offering easy book search, borrowing, and user management features.

Ashish (MCA-I [E]) – "Railway Ticket Booking Management System"
Developed using Java and SQL, this project streamlines ticket booking and passenger data management in a user-friendly interface.

Diya Ahuja (MCA-I [M]) – "DCSA Event Hub"
A centralized event management portal created using (Python, Flask, MYSQLite, HTML, CSS, Javascript), designed to simplify event coordination within the department.

Vanshika (MCA-I [E]) – "Online Voting System"
A secure and efficient voting platform developed using PHP, MySQL, and Bootstrap, ensuring transparency and time efficiency in digital elections.

Dr. Anuj Sharma (Chairperson, DCSA), Prof. R.K. Singla, Prof. Indu Chhabra, Dr. Anuj Kumar, Ms. Anjali Jindia, Ms. Kamakshi Pundir and Ms. Vaishali also graced the venue with a visit, reviewed each project, and shared insightful feedback. Their suggestions provided invaluable guidance, helping students refine their projects and think beyond the classroom. Students expressed that participating in "Tech-Infinity" was an enriching learning experience, allowing them to gain exposure, improve their presentation skills, and receive constructive feedback. They appreciated the opportunity to display their creativity and interact directly with faculty experts.

The event concluded with Dr. Anuj Sharma congratulating every participant and awarding Certificates of Appreciation to recognize their efforts. The projects demonstrated not only technical proficiency but also strong problem-solving and design thinking qualities that are vital for future placement drives and industry readiness.

-Diya Ahuja (MCA-I[M]) and Ramita (MCA-I[E])

Editorial Excellence Continues: New Team Members Step in for 2026

The current Editorial Team of the Department conducted a selection process for the formation of its new Editorial Team under the supervision of faculty coordinators, Dr. Jasleen Kaur Bains and Dr. Supreet Thapar. The interviews were held on September 18, 2025, to shortlist newly admitted students for various editorial roles. A total of 31 students enthusiastically applied through a google form for different roles such as report writing, design, data collection, and photography, showcasing their interest in contributing to the department's creative and intellectual endeavors. The interviews were conducted across three panels, each comprising 2–3 team members from the existing Editorial Team, who ensured a fair and insightful evaluation.

The current Editorial Team of the Department conducted a selection process for the formation of its new Editorial Team under the supervision of faculty coordinators, Dr. Jasleen Kaur Bains and Dr. Supreet Thapar. The interviews were held on September 18, 2025, to shortlist newly admitted students for various editorial roles. A total of 31 students enthusiastically applied through a google form for different roles such as report writing, design, data collection, and photography, showcasing their interest in contributing to the department's creative and intellectual endeavors. The interviews were conducted across three panels, each comprising 2–3 team members from the existing Editorial Team, who ensured a fair and insightful evaluation.

Each applicant underwent a structured assessment focusing on their communication skills, creativity, confidence, and suitability for their chosen roles. After a comprehensive evaluation process, 13 students were selected to join the Editorial Team. We are glad to mention that all of them — Aayush Gupta (MCA-I [E]), Aayushi Manchanda (MCA-I [M]), Anjali Sharma (MCA-I [M]), Arnav Khantwal (MCA-I [M]), Anshit Sehgal (MCA-I [M]), Diya Ahuja (MCA-I [M]), Girija Sharma (MCA-I [M]), Karan Arora (MCA-I [E]), Mansi Kang (MCA-I [M]), Ramita (MCA-I [E]), Sahil Pathania (MCA-I [M]), Rishabh Bhatia (M.Sc.-I [Data Science]), Simran (M.Sc.-I [Data Science]) — have contributed to this newsletter issue.

The newly selected members are expected to bring fresh perspectives, dynamic energy, and a strong dedication to enhancing the department's publications and events, further strengthening the team's vision of meaningful communication, creative expression, and collaborative excellence

-Ishneet Kaur (MCA-II [M]) and Girija Sharma (MCA-I [M])

TPC Interviews for the Formation of the New TPC Team – 2026

In the month of September, interviews were held to select new members for the Training and Placement Cell (TPC) for the academic year 2026. The current TPC members organized and coordinated the entire selection process under the guidance of TPO's - Dr. Anuj Kumar and Dr. Kavita Taneja, ensuring a fair and comprehensive evaluation of applicants.

Interested students were invited to apply through Google Forms, and a large number of applications were received. The first round of interviews was conducted virtually via google meet, where candidates were evaluated on their communication skills, confidence, and understanding of the TPC's responsibilities. Based on their performance, shortlisted candidates were then called for the second round, which consisted of offline, one-on-one panel interviews held in the department.

During these face-to-face sessions, candidates were assessed by panels of existing TPC members on various parameters, including leadership qualities, problem-solving ability, and teamwork.

After a comprehensive evaluation process, the students selected as members of the prospective team of the Training and Placement Cell (TPC) for the year 2026 are: Aayushi Manchanda (MCA-I [M]), Akhil (MCA-I [E]), Anuj Rawat (MCA-I [M]), Arin Devyaal (MCA-I [M]), Daljeet Singh (MCA-I [E]), Diya Ahuja (MCA-I [M]), Jasleen Kaur (M.Sc.-I [Data Science]), Jasleen Saini (MCA-I [E]), Kritika (MCA-I [E]), Kuldeep Singh (MCA-I [M]), Mahesh Chandra (M.Sc.-I [Data Science]), Neha (MCA-I [M]), Prachi (MCA-I [M]), Rahul Sharda (MCA-I [E]), Rohit Kumar (MCA-I [M]), Ronak Sood (MCA-I [E]), Sahil Pathania (MCA-I [M]), Sanjam Sappal (M.Sc.-I [Data Science]), Vanshika Garg (MCA-I [M]), and Vishal (MCA-I [E]).

The selection process was designed to identify dedicated and capable students who could effectively contribute to the department's placement initiatives. The newly formed TPC team is expected to bring fresh ideas, enthusiasm, and professionalism to strengthen student–industry connections and support placement-related activities throughout the year.

- Arsh Divya (MCA-II[M])

IT Club Recruitment 2026

On September 23, 2025, the IT Club of the Department conducted interviews to recruit enthusiastic and talented members for the upcoming session. The club members carried out the interviews with the aim of identifying students who demonstrated strong technical knowledge, creative thinking, and a genuine passion for innovation. Students from both M.C.A and M.Sc. (Data Science) participated with energy and confidence. The interview questions covered areas such as system management, computer functionality, programming fundamentals, logical reasoning, and teamwork. The seniors ensured a welcoming and encouraging atmosphere, motivating juniors to express themselves freely and present their ideas with clarity.

They also offered valuable insights into the club's future initiatives, including skill-oriented workshops, exciting coding competitions, and collaborative technical projects. The event served as a bridge for juniors to gain confidence and build meaningful connections with their seniors. Overall, it was a highly successful and inspiring initiative that fostered learning, strengthened teamwork, and ignited enthusiasm for technology-driven innovation.

The students selected as members of the IT Club for the session 2026 are :

Akriti Thakur (M.Sc.-I [Data Science]), Amit Rawat (MCA-I [E]), Anuj Rawat (MCA-I [M]), Arnav Khantwal (MCA-I [M]), Diya Ahuja (MCA-I [M]), Faiz Alam (MCA-I [E]), Gautam Singh (MCA-I [E]), Karan Arora (MCA-I [E]), Shashwat Sharma (MCA-I [E]),

Mahesh Chandra (M.Sc.-I [Data Science]), Monika Negi (M.Sc.-I [Data Science]), Prachi (MCA-I [M]), Rajat Kumar (MCA-I [M]), Ratan Gulati (MCA-I [M]), Ronak Sood (MCA-I [E]), and Vishal (MCA-I [E]).

– Kashish (MCA-II [M]) and Anjali Sharma (MCA-I [M])

Alumni Team Group Discussion

A group discussion was organized under the esteemed guidance of Prof. (Dr.) Anu Gupta and Dr. Supreet Thapar to induct first-year students into the Alumni Team. The session was conducted by the existing team members and aimed at identifying enthusiastic and capable students to join the team.

The session witnessed active and enthusiastic participation from first-year students of both MCA and M.Sc. programs. The discussion served as a platform to assess their communication, teamwork, and leadership skills, with the primary goal of shortlisting a dynamic team of first-year students who will play a key role in organizing the upcoming Alumni Meet.

The group discussion also covered the general issues faced by alumni during and prior to the event, along with the proposal of constructive solutions to address them. Additionally, participants shared new ideas and suggested improved practices to be incorporated in future events.

After thorough evaluation, a total of 14 students were shortlisted for the First Year Alumni Team, comprising participants from (M.Sc.-I [Data Science]), MCA-I [M], and MCA-I [E]. The selected students are Arin Devyaal (MCA-I [M]), Karan Arora (MCA-I [E]), Mehak (M.Sc. -I [Data Science]), Mahesh (M.Sc.-I [Data Science]), Sachin (M.Sc.-I [Data Science]), Balpreet Kaur (M.Sc.-I [Data Science]), Rohan (MCA-I [E]), Anuj Rawat (MCA-I [M]), May (M.Sc.-I [Data Science]), Satvik (M.Sc.-I [Data Science]), Daljeet (MCA-I [E]), Rohit Kumar (MCA-I [M]), Sneha (M.Sc.-I [Data Science]), and Rishabh Bhatia (M.Sc.-I [Data Science]).

Overall, the group discussion was a productive and successful initiative, encouraging teamwork, leadership, and active student involvement in departmental activities.

-Nancy (MCA-II [E])

Hanu AI Placement Drive

HanuAi

The HanuAI Placement Drive was held on September 4, 2025, offering MCA and M.Sc (Data Science) students a valuable opportunity to explore roles in Artificial Intelligence and Machine Learning. The drive focused on hiring an AI/ML Developer, requiring strong skills in PyTorch, TensorFlow, Python, Django, and analytical problem-solving.

The recruitment process involved a telephonic interview followed by an assessment round that evaluated technical knowledge, logical reasoning, and the ability to complete tasks within deadlines—skills essential for real-world AI development.

After a thorough selection process, Bhuvandep Singh (MCA-II, Regional Centre Hoshiarpur) was chosen for the AI/ML Developer position. The drive concluded successfully, reinforcing the institution's dedication to developing industry-ready professionals and encouraging excellence in emerging technologies.

The department congratulates Bhuvandep Singh on his achievement and wishes him a bright professional future.

-Sargundeep Singh (MCA-II[M])

ChicMic Placement Drive

The Department has always been proactive in creating meaningful placement opportunities for candidates from the main campus and its regional centres at Hoshiarpur and Muktsar. Upholding this strong tradition of fostering industry-academia collaboration, it successfully organized a placement drive in collaboration with ChicMic Studios on September 10, 2025 — marking another milestone in its ongoing efforts toward student career development.

This initiative was spearheaded by Mr. Chavi Jindal, an esteemed alumnus of DCSA, who played a key role in building this professional bridge with Chicmic Studios. Since then, the company has consistently recruited talented DCSA students, further strengthening the alumni-industry bond.

The drive witnessed enthusiastic student participation, reflecting both their preparedness and the department's commitment to holistic career grooming. The collaboration continues to stand as an inspiring example of how alumni can contribute to the professional growth of their alma mater.

ChicMic Studios, a leading IT solutions and game development company based in Mohali, is known for its expertise in mobile and web applications, game design, and software innovation. The company offered roles such as Associate Software Developer, Quality Analyst, PHP Developer, Web Designer, Business Development Executive (BDE), and Data Science Trainee.

The first round focused on evaluating candidates' technical and aptitude skills—an elimination test assessing problem-solving, logical reasoning, and analytical abilities. It covered diverse areas like data structures and algorithms for SDEs,communication and business analysis for BDEs, test case design and error detection for QA roles, and UI/UX and front-end proficiency for Web Designers.

Shortlisted candidates then appeared for in-person interviews, including two technical rounds and a final HR round. The interviewers created a supportive atmosphere, allowing students to showcase their skills confidently.

At the end of the process, 11 students were successfully placed at ChicMic. The selected students are:

Arshpreet Kaur (MCA-II [M]), Har Sukrit Oberoi (MCA-II [M]), Hena (MCA-II [E]), Komal Verma (MCA-II [M]), Nayan Joshi (M.Sc.), Nidhi Bhatia (M.Sc.-II [Data Science]), Parneet Kaur (MCA-II [E]), Sableen Kaur (M.Sc.-II [Data Science]), Sahil Sharma (MCA-II [M]), Twinkle (MCA-II [M]), and Yashasvee (MCA-II [E]).

The drive concluded on a high note, with participants praising the professional and enriching experience. It highlighted ChicMic Studios dedication to nurturing young talent and the department's unwavering commitment to bridging academia with industry. The department congratulates all selected students and extends best wishes for their future endeavors.

- Arsh Divya (MCA-II[M]) & Diya Ahuja (MCA-I[M])

Avisoft Placement Drive

On September 20, 2025, the Department successfully organized the placement drive in collaboration with Avisoft for the role of Software Engineer Trainee. A total of 69 students took part in the placement drive. The event began with an insightful pre-placement talk delivered by Mr. Avinash Sharma, Founder, Avisoft, who introduced the company, its core values, innovative work culture, and promising career opportunities. The session provided students with valuable insights into the company's journey, including how it was founded and expanded over the years, its core goals of delivering innovative solutions and maintaining customer satisfaction, and the objectives it follows to achieve sustainable growth and technological advancement.

The recruitment process consisted of three rounds conducted systematically throughout the day. The first round was the written test comprising Data Structures and Algorithms (DSA) coding questions, which tested the logical and problem-solving abilities of students. The shortlisted candidates then appeared for the Technical Interview Round, where they demonstrated their programming proficiency, conceptual clarity, and understanding of core subjects. The final CEO Interview Round evaluated communication skills, confidence, and overall personality of the candidate.

The drive was concluded in a smooth and efficient manner, and four students — Aditya Sharma (MCA-II [E]), Disha Gupta (MCA-II [M]), Prabhjot Kaur (M.Sc.-II [Data Science]) and Rishav Kumar (MCA-II [E]) — successfully cleared all stages and were selected for placement at Avisoft. The DCSA continues to play a vital role in providing such valuable platforms, guiding students toward professional excellence, and helping them step confidently into the ever-evolving world of technology. TThe department is delighted to commend the selected students on their impressive achievement and sends best wishes for their future professional journey.

-Sahil Pathania (MCA-I [M])

Penthara Technologies Placement Drive

The Department organized a placement drive for Penthara Technologies on September 24, 2025. The company offered opportunities for four roles — Project Management, Design, Digital Marketing, and Cloud Administration — providing students with diverse career options based on their skills and interests. A Total 77 number of students enthusiastically participated in the drive, showcasing their talent and eagerness to begin their professional journey.

The recruitment process included multiple stages. The first round consisted of a computer-based multiple-choice (MCQ) test designed for candidates based on their roles they had applied for. The questions were carefully curated to assess both technical knowledge and domain-specific understanding.

For the Cloud Administration role, students faced questions covering the basics of networking, Linux operating systems, hardware troubleshooting, basic shell scripting, and the fundamentals of virtualization.

Those who applied for Project Management were tested on their understanding of the Software Development Life Cycle (SDLC), Agile and Scrum methodologies, as well as their knowledge of Power BI.

Candidates for other domains, such as Design and Digital Marketing, also attempted role-specific questions. The design role included questions to assess creativity and technical proficiency, while the digital marketing role included questions related to SEO and other essential marketing concepts.

This was followed by an HR round that focused on communication skills, personality, and questions related to the specific roles for which the students had applied. Shortlisted candidates then appeared for a virtual online test and an interactive session with Mr. Jasjit Chopra, CEO of Penthara Technologies, which offered valuable industry insights and exposure.

After the evaluation process, four students were selected for placement at Penthara Technologies: Madhia (M.Sc.-II [Data Science]), Gurmukh Singh (MCA-II [M]), Rajbir (MCA-II[E]), and Shriya Bhardwaj (M.Sc.-II[Data Science]. The department congratulates the selected students and appreciates the efforts of the placement coordinators and faculty members for ensuring the smooth and successful conduct of the drive.

- Ishneet Kaur (MCA-II [M])

Quark Placement Drive

On September 30, 2025, the Department actively participated in a placement drive organized in collaboration with Quark Software Inc. The pooled placement drive was hosted at Chandigarh College of Engineering and Technology (CCET), Chandigarh, and witnessed enthusiastic participation from students across multiple institutions. The event commenced with an insightful pre-placement talkby Ms. Monika Sharda, HR at Quark Software Inc., who introduced the company's vision, work culture, and growth opportunities.

The drive then proceeded with a written test designed to assess the candidates' aptitude, problem-solving, and coding abilities. Students who excelled in the test advanced to multiple rounds of technical interviews, where they were rigorously evaluated on programming concepts, analytical reasoning, and practical understanding of software development. Those who demonstrated both technical depth and clarity of thought were shortlisted for the final HR round, which focused on communication skills, teamwork, and overall personality assessment.

After a competitive and merit-based selection process, Harkirat Kaur (MCA-II [E]) and Rahul Kumar (MCA-II[E]) showcased exceptional performance and were successfully selected for internship at Quark Software Inc. The department warmly congratulates the selected students on their remarkable achievement and extends best wishes for their bright and successful professional journeys ahead.

-Sargundeep Singh (MCA-II [M])

Booking Koala Placement Drive

The Department organized a placement drive with Booking Koala, LLC | Sales Hangry, LLC on October 11, for the position of Associate Software Engineer at their Mohali location. Booking Koala is an all-in-one platform that helps businesses in the service industry, such as home cleaning, car detailing, and lawn care, grow through technology, automation, and community engagement. The drive was open to students pursuing M.Sc. (Computer Science – Data Science) and M.C.A.

The recruitment process consisted of three rounds. The first round was a pen-and-paper coding test based on Data Structures and Algorithms (DSA), which included problems such as pattern printing, matrix multiplication, and palindrome checking. Based on their performance, four students were shortlisted for the next stage. The second round was a technical interview that focused on practical coding implementation and conceptual understanding. The final round was an HR interview, which focused on behavioral and situational questions to assess the candidates' communication skills, attitude, and cultural fit.

After the completion of all rounds, two students, Aditi Attri (MCA-II [E]) and Garima (MCA-II[E]), were successfully placed at Booking Koala. The department congratulates the selected students and appreciates the efforts of the placement

cell for organizing a successful recruitment drive that provided valuable industry exposure to the students.

- Arsh Divya (MCA-II[M])

Infosys Placement Drive

On October 27, 2025, the Department actively participated in a placement drive organized in collaboration with Infosys. The placement drive was hosted at UIET south campus Panjab University, Chandigarh.The event served as an excellent opportunity for students to demonstrate their abilities and secure positions in one of the country's leading IT companies. The recruitment process was conducted in two main rounds. The first round was an online test held on laptops, consisting of seven sections—Quantitative Aptitude, Reasoning Ability, Verbal Ability, Puzzle Solving, Pseudo Code, English Grammar, and Essay Writing. This round aimed to evaluate the candidates' analytical, logical, and communication skills. Based on the performance in this test, shortlisted candidates qualified for the next round, which was the interview.

In the interview round, candidates were asked questions related to the details mentioned in their resumes, including their projects, strengths and weaknesses, and teamwork experiences. Technical questions were also asked from Object-Oriented Programming (OOPs) concepts such as polymorphism and from Data Structures, particularly focusing on the difference between stack and queue. After the successful completion of both rounds, the final selected students were Rahul Verma MCA-II[M].Mehak Verma MCA-II [E], and Sanya MCA-II [Regional Centre Muktsar].

The Infosys placement drive concluded successfully, providing students with valuable exposure to the recruitment process and motivating them to prepare diligently for future opportunities. The department celebrates the success of the selected students and conveys its best wishes as they progress toward the next stage of their careers.

-Ishneet kaur (MCA-II [M])
