Report

Chascon-2020

Panjab University organized Chandigarh Science Congress from 17-19 December, 2020. The Departmental events were conducted on 18th December, 2020. The schedule followed and the flyer for December 18, 2020 are given in Annexure – 1 and 2 respectively.

Prof. A.G. Ramakrishnan, Indian Institute of Science, Bangalore delivered a talk from 10 to 11.30 am with the following details

Title: Hard-coded features and DNN.

Abstract: Human vision is the most sophisticated pattern recognition system known to us. Human sensory pathways use very rich, active feedback during the recognition process. For example, at the LGN, 31 percent of the synapses are due to feedback from the corticothalamic circuits, whereas only 7 percent are due to the inputs from the retinal ganglion (feedforward circuits). Similarly, in the auditory pathway, there is active feedback to the outer hair cells in the basilar membrane, which in turn modulate the responses of the inner hair cells to the auditory stimuli. Also, attention plays a very important role in visual processing and perception by modulating the sensitivity and selectivity. Approximately 30 participants attended the talk and interacted with the speaker.

After Prof. A.G. Ramakrishnan's talk, the following four students and research scholars made oral presentations of work done by them.

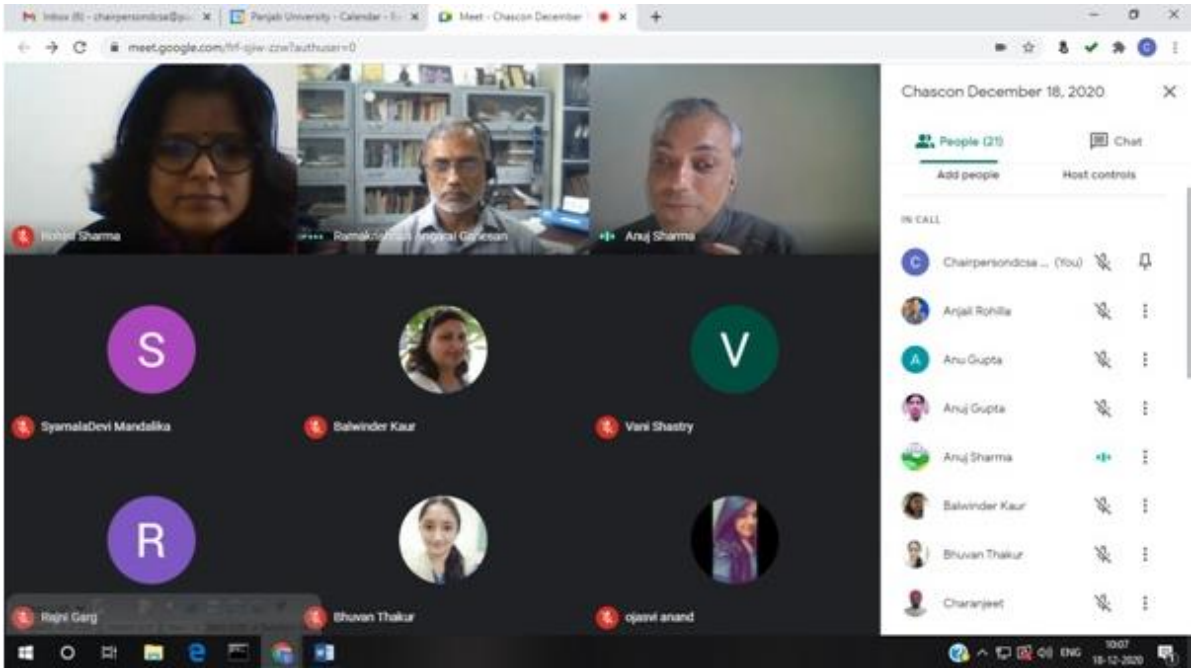

- Anjali Rohilla (Department of Computer Science, Punjabi University, Patiala), A survey of digitized handwritten signature verification system.
- Jaswinder Singh (DCSA Panjab University, Chandigarh), Towards measuring maintainability of open source software.
- Lalita Kumari (DCSA Panjab University, Chandigarh) Word spotting in cursive handwritten documents.
- Manpreet Kaur, (DCSA Panjab University, Chandigarh) Review of IOT based systems in epidemics

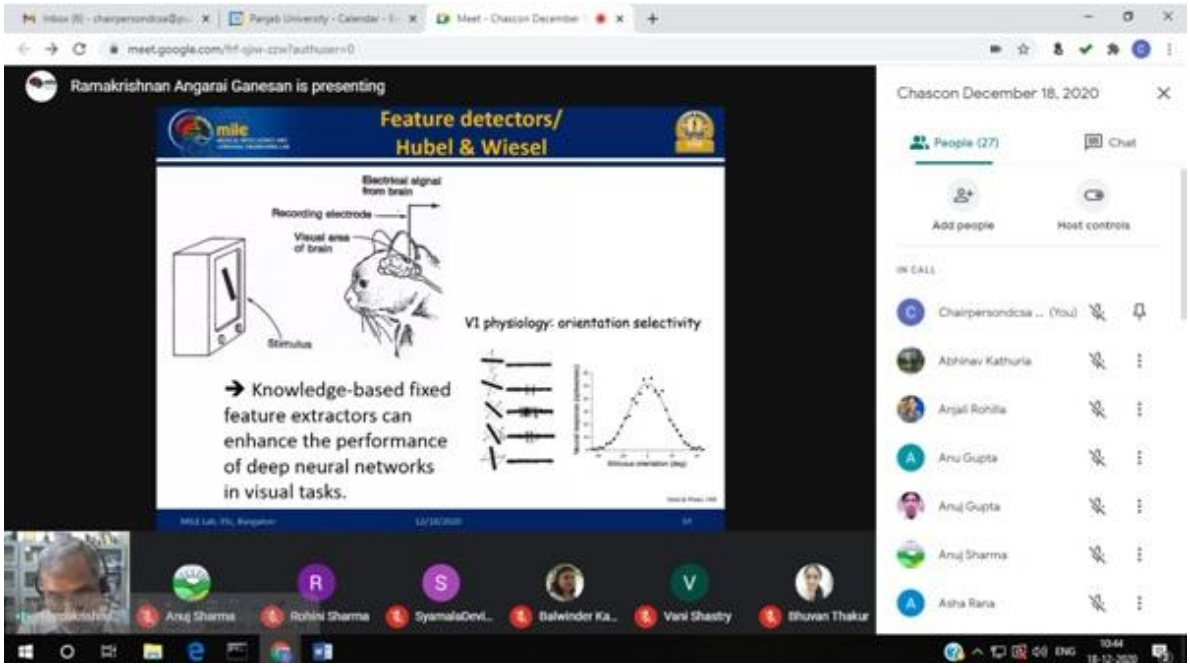

Professors M. Syamala Devi and Indu Chhabra acted as judges. Lalita Kumari was chosen for the first prize

After the oral presentations, following students/research scholars made poster presentations of work done by them.

- Ojasvi Anand (GGDSD College,Chandigarh) Palm Secure- Palm Vein Technology
- Sarita (DCSA Panjab University, Chandigarh) Image based traffic light recognition system

Professors M. Syamala Devi and Indu Chhabra acted as judges. Sarita was chosen for the first prize.

Annexure - I

CHASCON – 2020

"Mathematical Science" Section

Schedule for December 18, 2020

Time	Event
10:00 - 11:30 am	Expert Talk Prof. A.G. Ramakrishnan Department of Electrical Engineering, Indian Institute of Science, Bangalore.
11:30 am onwards	Online Oral Presentations
1:00 – 2:00 pm	Lunch break
2:00 pm onwards	Online Oral/Poster Presentations

Department of Computer Science and Applications

Link for 18th December, 2020 for Department of Computer Science and Applications:

Annexure – 2

DEPARTMENT OF COMPUTER SCIENCE AND APPLICATIONS
PANJAB UNIVERSITY CHANDIGARH
INVITES YOU TO
CHASCON-2020
Science and Technology Innovations:
Ushering in the era of Make in India
18th December
10:00 - 11:30 am
SPEAKER
Dr. A.G. Ramakrishnan
Professor
Department of Electrical Engineering,
Indian Institute of Science, Bangalore
