Webinar on "Data Structure and Problem Solving for interviews" 2020

On 24th May 2020, Sunday. Department Alumni collaborated with Department of Computer Science & Applications, Panjab University to host a webinar on Data Structure and Problem Solving for interviews. The session was conducted by Mr. Tushar Mehta, Department Alumni & Senior developer at Airtel.

About the event:

A webinar dated 24 May 2020 with mentor Mr. Tushar Mehta was centered on Data Structure and Problem Solving for interviews. In total 62 students from the department attended the online workshop.

The speaker started by stating the differences between product-based and service-based companies compared to the type of work culture in both. He clearly mentioned the importance of having a perceptive about what type of career we want instead of focusing on grabbing a good job only. Then he went onto explaining what all data structures we should learn, also mentioned the resources (offline and online) to refer to. He suggested insights on how to study Data Structures with a problem-solving attitude like the memory allocation associated, operations on a particular data structure.

The speaker is an alumnus of our department therefore he was well versed with the placement criteria as well as the placement scenario. The webinar was conducted to guide the students to get knowledge about the data structures and problem-solving techniques for the interview purpose. The webinar was a good one overall and various data structures were discussed and expert guidance was provided to the students regarding the same. Overall, the webinar went well and the speaker even assured to help the students, if a need arises, for various companies.
