One Day Workshop on 'Machine Learning Techniques'

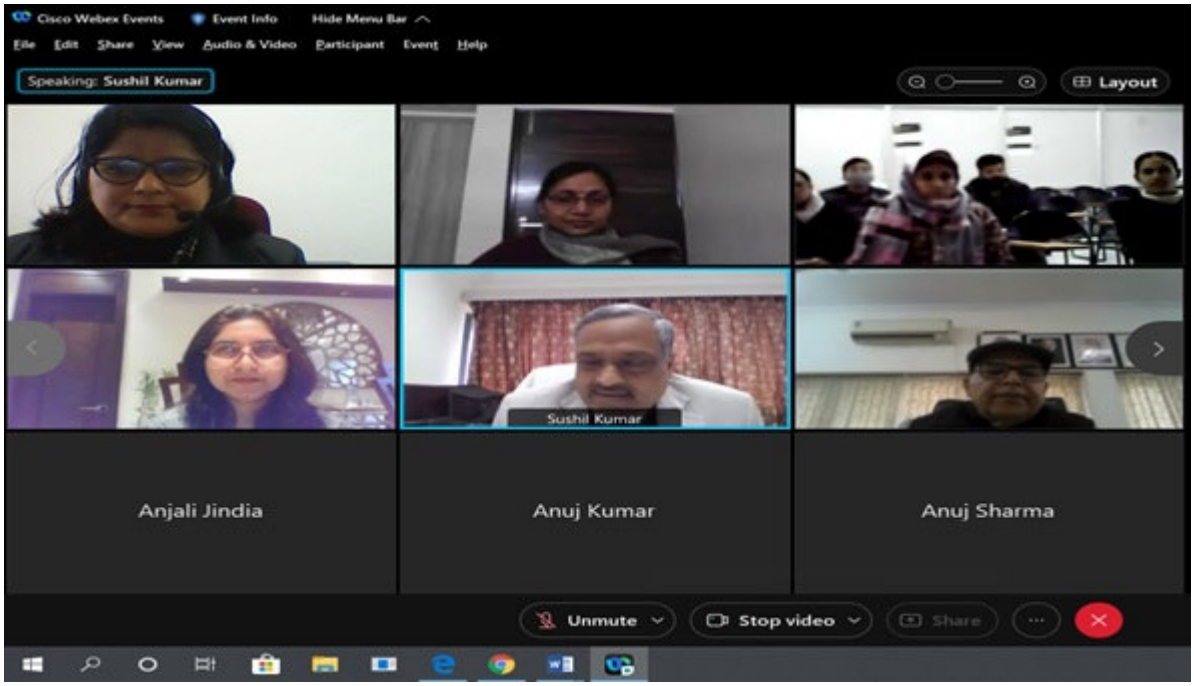

REPORT

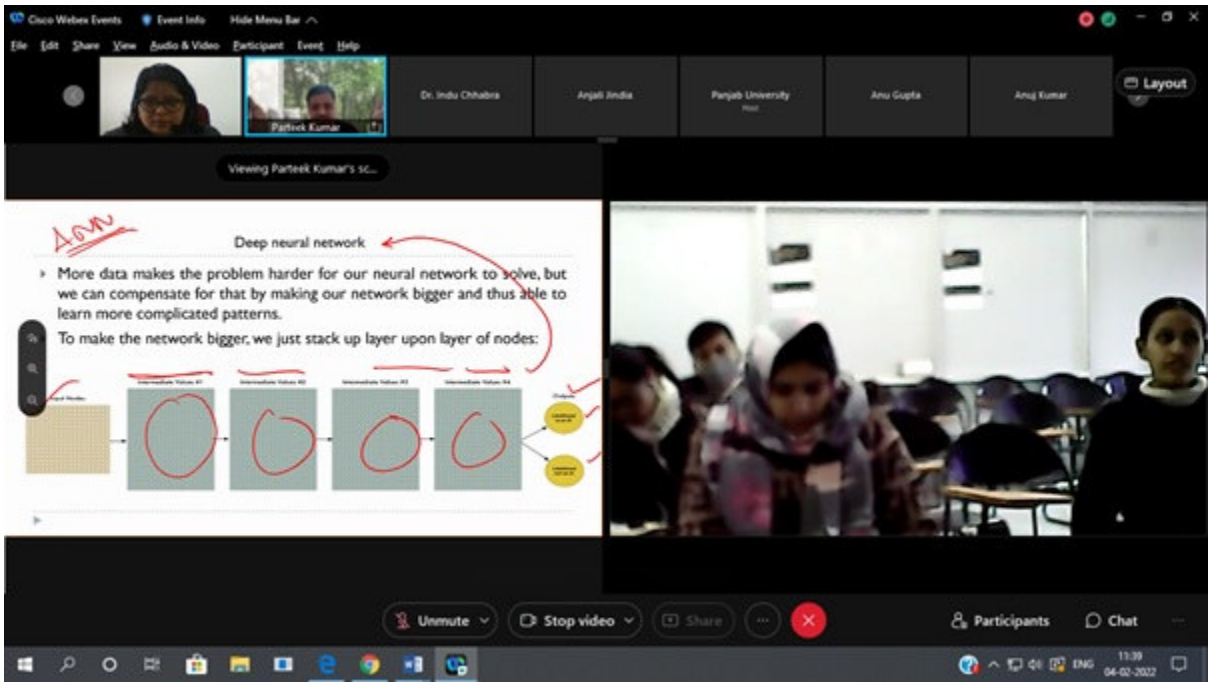

The Department of Computer Science and Applications, Panjab University, Chandigarh organized One Day Workshop on 'Machine Learning Techniques' on 4th February 2022. The program started with the welcome address by Dr. Rohini Sharma, Chairperson and Coordinator of the workshop. She informed that around 300 participants from 15 different states of India, from industry and from overseas registered for the event. Prof. S. K. Tomar, Dean University Instructions talked about the pros and cons of technology in human life. He expressed that machine learning is an emerging area and various developments in this field will help the current and future generations.

Prof. Tankeshwar Kumar, Hon'ble Vice-Chancellor of the Central University of Haryana inaugurated the workshop. He linked the idea of machine learning with astrology and astronomy in ancient times where through observations, predictions were made.He shared the idea that machine learning has tremendous applications in healthcare, agriculture, business and many other sectors. The predictions made by machines may help us to protect our environment, do wonders in healthcare to save lives and bring huge changes in the world. The inaugural session concluded with the Vote of Thanks delivered by Prof. Indu Chhabra.

In the first technical session, Prof. Prateek Bhatia, Visiting Professor at LAMBDA Lab, at Tel Aviv University, Israel and Professor at Thapar Institute of Engineering and Technology, Patiala, discussed about Identification of objects with Deep Learning Techniques. He explained in detail the working of Convolutional Neural Network with the description of different steps like convolution, max pooling, flattening and full connection. The session ended with an interesting quiz on the topic covered.

In the second technical session of the day, Dr. Anuj Sharma, Department of Computer Science & Applications, Panjab University,Chandigarh. (Post Doc from RWTH Aachen University, Germany) explained Machine Learning based Regression and Classification techniques like linear, polynomial, support vector, decision tree, random forest regression, logistic regression, k-nearest neighbour, naïve bayes along with implementation. The workshop was well appreciated by the participants.

Deep neural network
More data makes the problem harder for our neural network to solve, but we can compensate for that by making our network bigger and thus able to learn more complicated patterns.
To make the network bigger, we just stack up layer upon layer of nodes:

ABOUT THE DEPARTMENT

The Computer Culture at the Panjab University dates back to 1966. An independent Centre for Computer Science and Applications (now a full fledged department) was set-up in 1983. The department aims at ingraining the spirit of ingenuity, innovativeness and technical competence in the students through rigorous competition and regular guidance. The department also caters to the need of users in the region and organizes programmes for teaching and research communities.

The Department is running Master of Computer Applications (MCA) (3 year full time course) introduced in 1992. Master of Computer Applications (3 year full time course) in Self Finance mode introduced in 2008 and Masters of Science (Honors School) under the framework of Computer Science was introduced in year 2004. Admissions to these course are held through an annual entrance test conducted on All India basis by Panjab University. In addition, Ph.D. Program has been started from year 2005.

The department has its own well-equipped library with over more than 10,000 books and resources for exclusive use of the students and the faculty.

The department has an excellent placement record. Major recruiters are Infosys, Deloitte, Mediatek, Quark, Sufi, Negaro, Indus valley parters and many more.

WHO CAN ATTEND
Faculty, Research Scholars, Students

Registration Fee :Nil

Registration through: Google Form link available at https://forms.gle/6EVGwXjWjtAjMUCz9

Dates: **February 4, 2022**

Time:10:00 AM to 04:00 PM

Last Date of Registration:
January 31, 2022 till 12.00 midnight

Online Link of the Workshop will be shared with registered participants and speakers only.

RESOURCE PERSONS

1. Prof. Prateek Bhatia, Department of Computer Science and Engineering, Thapar Institute of Engineering and Technology, Patiala; Visiting Professor at LAMEDA Lab, at Tel Aviv University, Israel.
2. Dr. Anuj Sharma, Department of Computer Science & Applications, Panjab University, Chandigarh. (Post Doc from RWTH Aachen University, Germany).

Contents to be covered

Prof Prateek Bhatia: Identification of objects with Deep Learning Techniques (CNN)

Dr. Anuj Sharma: Machine Learning based Regression and classification Implementation.

SCHEDULE

Inaugural Session	**10:00 a.m.**
Welcome Address by Dr. Rohini Sharma	10:00 a.m.
Address by Prof. S.K. Tomar, DUI	10:05 a.m.
Address by Prof. Raj Kumar, Hon'ble Vice Chancellor	10:10. a.m.
Inaugural Address by Prof. Tankeshwar Kumar, Hon'ble Vice Chancellor, Central University of Haryana	10:25 a.m.
Vote of Thanks by Prof. Indu Chhabra	
Tea Break	**10:45 a.m.**
Session-I	
Prof. Parteek Bhatia Department of Computer Science and Engineering, Thapar Institute of Engineering and Technology, Patiala; Visiting Professor at LAMBDA Lab, at Tel Aviv University, Israel	11:00 a.m. to 1:00 p.m.
Lunch Break	**01:00 p.m. to 2:00 p.m.**
Session-II	
Dr. Anuj Sharma Department of Computer Science & Applications, Panjab University, Chandigarh. (Post Doc from RWTH University, Germany)	02:00 p.m. to 04:00 p.m.
Valedictory	**4:00 p.m**.
