The third session was conducted by Dr. Suman Dhull (D.A.V. College, Sector 10, Chandigarh) with Mr. Varinder (SD College, Chandigarh) as co-coordinator, where they offered thoughtful suggestions on course updates and the roadmap for introducing advanced programmes. Together, all three sessions created a strong platform for discussion, where participants actively engaged, exchanged ideas, and contributed collectively towards shaping a future-ready curriculum for undergraduate students. The programme concluded with a formal vote of thanks delivered by Dr. Anuj Sharma. Mementos and certificates were presented to the participants as a token of appreciation by the course coordinators, Dr. Anuj Sharma and Prof. (Dr.) Sonal Chawla, along with the DCSA faculty members, and the event concluded with lunch for all.

The successful management of work-related to participants registrations and other administrative and logistical processes was made possible by the dedicated efforts of faculty members Ms. Anjali Jindia, Mr. Ujjwal Thakur, and Ms. Kamakshi Pundir along with research scholars Vaishali Mehta, Karan Pathania, and S. Ratna. Dr. Jasleen Kaur Bains anchored the workshop.

December Exams: Winter of Questions, Spring of Answers

The December semester examinations were successfully and smoothly conducted for regular and reappear classes of MCA and M.Sc. Computer Science (Specialization in Data Science) programs, marking an important academic milestone for students. Dr. Jasleen Kaur Bains and Dr. Balwinder Kaur efficiently discharged their responsibilities as Centre Superintendent and Deputy Centre Superintendent, respectively.

The examination process was well supported by the dedicated efforts of the faculty invigilators, administrative, and support staff. Mr. Mangat and Mr. Manpreet Singh provided valuable clerical assistance, while Krishan, Ashwini, and Ghanshyam rendered essential services as peons. The sustained support, professionalism, and effective coordination of the non-teaching and technical staff contributed significantly to the efficient and orderly conduct of the examinations.

The examinations were preceded by practical examinations held from November 27, 2025 to December 4, 2025, followed by theory examinations conducted from December 5 to December 23, 2025. More than a mere assessment of knowledge, the December examinations reflected resilience, unity, and the spirit of collective learning. As the results are awaited, the department extends its best wishes to all students for their forthcoming results.

RAIK SOLUTIONS PLACEMENT DRIVE

On November 6, 2025 the department successfully organised a placement drive for students of MCA and Msc (data science)in collaboration with RAIK Solutions. Raik Solutions is an IT company that works in the area of software development and customized technology solutions for government bodies and private organizations. The company offered opportunities for roles such as Software development engineer and Validation engineer.

A total of 60 students from the main campus enthusiastically participated in the drive. The company representatives began the drive with a pre-placement talk, during which they introduced the organization, explained the nature of their projects, and discussed the roles being offered. Students were also informed about the skills expected and the working environment at RAIK Solutions.

The recruitment process was conducted in multiple stages. Students first appeared for a coding assessment, followed by a subjective assessment to test their understanding of technical concepts. Candidates shortlisted from these rounds were then called for the HR round, where communication skills, confidence, and overall fit for the organization were evaluated.

After the evaluation process two students—Har Sukrit Oberoi (MCA[M]) and Samriti Kanwar (MCA[E]) were selected. The placement drive was completed smoothly and proved to be a valuable experience for the participating students, further supporting the institution's efforts to connect academic learning with industry requirements.

Accenture Placement Drive 2025: Opening Doors to Global Careers

The Department successfully organized a two-day placement drive by Accenture on November 10 and 11, 2025 offering students an excellent opportunity to begin their professional journey with one of the world's leading consulting and technology firms. Accenture is globally renowned for its expertise in digital transformation, technology services, consulting, and operations, working with top organizations across industries to drive innovation and sustainable growth. With a strong emphasis on problem-solving, adaptability, and continuous learning, Accenture provides young professionals with a dynamic and future-ready work environment.

The placement process commenced with an online assessment round, designed to comprehensively evaluate candidates' technical knowledge and analytical abilities. This round consisted of three integrated components:

- Coding assessment, testing programming logic and problem-solving skills
- General aptitude, focusing on quantitative, logical, and verbal reasoning
- Technical assessment, assessing conceptual clarity and application skills

Students who successfully cleared the online assessment advanced to the second round, which was a presentation-based evaluation and HR round conducted at Accenture's office. This round aimed to assess candidates' communication skills, clarity of thought, confidence, and professional presentation, providing a real-world corporate exposure to the shortlisted students. The drive witnessed enthusiastic participation, reflecting the wide reach and strong reputation of both the Department and the recruiting organization. After a rigorous and competitive selection process, eight students were successfully placed, marking a proud moment for the Department.

The selected candidates include Aditya Sharma (MCA-II [E]) for AASE, Aman Kumar (MCA-II [M]) for ASE, Komal Verma (MCA-II [M]) for ASE, Manmeet Singh (MCA-II [E]) for ASE, Nupur (MCA-II [M]) for ASE, Samriti Kanwar (MCA-II [E]) for AASE, Shine Gupta (MCA-II [E]) for AASE, and Shriya Dhiman (MCA-II [E]) for ASE. Their success across roles such as Associate Software Engineer (ASE) and Advanced Associate Software Engineer (AASE) highlights their technical competence, adaptability, and professional potential.

The Department extends its heartfelt congratulations to all the selected students and wishes them great success in their future professional endeavors. Their achievement stands as a testament to their dedication, perseverance, and the Department's continued commitment to academic excellence and career readiness.

Solitaire Infosys Placement Drive 2025: Encouraging Industry-Oriented Careers

The Department successfully organized a placement drive by Solitaire Infosys on November 21,2025, offering students an opportunity to begin their professional journey in the IT industry. The drive aimed to evaluate students' technical skills, analytical abilities, and professional readiness through a structured selection process. Solitaire Infosys is a Mohali-based reputed technology solutions company known for innovation, skill development, and quality IT services across various domains, providing a dynamic and growth-oriented work environment.

The recruitment process began with a Pre-Placement Talk, followed by an Aptitude Test to assess quantitative, logical, and verbal skills. Shortlisted candidates then appeared for a Coding Assessment, evaluating programming logic and problem-solving abilities. The final HR Round focused on communication skills, confidence, and overall professional suitability. The drive saw enthusiastic participation from students across multiple campuses. After a rigorous selection process, one student was successfully placed.

The selected student is Sukhdeep Kaur (MCA – Muktsar). She has been offered the role of junior software developer. The Department congratulates Sukhdeep Kaur on her achievement and wishes her continued success in her professional career.

Insightful Lecture on AI Classification by Dr. Anuj Sharma

On December 25, 2025, Dr. Anuj Sharma delivered an expert lecture on "Classification in Artificial Intelligence and Machine Learning" during the Faculty Development Programme organized at MCM DAV College, Chandigarh. The session was part of the department's initiative to enrich faculty knowledge in emerging domains of computer science.

Dr. Anuj Sharma was warmly received by the organizers and participants. His lecture focused on the fundamental role of classification techniques in AI and ML, explaining how these methods form the backbone of intelligent systems used in diverse applications such as image recognition and natural language processing. The lecture introduced different methods of classification, such as supervised and unsupervised learning, decision trees and neural networks. Dr. Anuj Sharma explained how these techniques help computers organize and understand complex data, and how they are increasingly useful in both academic studies and practical industry applications.

The session highlighted how these concepts can be woven into teaching and research, motivating faculty to apply them through practical examples and case studies.Participants engaged actively, raising questions about real-world challenges, algorithmic accuracy, and the future scope of AI-driven solutions. Dr. Anuj Sharma addressed these queries with clarity, offering insights into both theoretical foundations and practical implementations. The event proved to be highly informative and inspiring, equipping attendees with a deeper understanding of classification in AI and ML.
