## Chascon Event's Exhibition

On 5th November, 2024, students from the Department of Computer Science and Applications, Panjab University participated in the CHASCON event, proudly showcasing their technical expertise and innovative ideas. The participants included Gurbir Singh Dhaliwal, Vaibhav Sharma, Arijit Sharma, Taranjit Kaur, Bhavneet Saini, Kashish Sahu, and Gaurav Jakhar.

The projects presented were diverse and impactful. Project showcased were Event Management Mobile Application, a solution designed to streamline event planning by offering efficient tools for managing various event-related tasks. A Recipe Recommendation Application, focusing on reducing food waste by suggesting personalized recipes based on available ingredients. An Electoral Voting System Using Blockchain Technology, aimed at improving the transparency and security of voting processes through the innovative use of blockchain.

The event successfully highlighted the creativity and technical proficiency of the department's students, demonstrating their ability to address real-world problems with modern scientific solutions.

## GMSSS Kaithal Students Visit

On 5th November, 2024, Class 12th students from GMSSS Kaithal visited the Department of Computer Science and Applications on an educational trip. The visit provided an insightful opportunity for the students to explore the advancements in Computer Science, interact with faculty, and gain exposure to various technical applications, inspiring them toward pursuing careers in technology and innovation.

## Freshers & Farewell 2024

The combined Freshers and Farewell event, themed "Naya Daur" was joyously celebrated on 19th November, 2024. It was a lively and heartwarming celebration of new beginnings and fond farewells. The program, held with great enthusiasm, honored both the incoming first-year students and the outgoing seniors, creating a perfect blend of excitement and nostalgia. The event was coordinated by Dr. Anuj Kumar and Dr. Kavita Taneja. The presence of distinguished alumni S. Lt. Arsh Sharma, who is currently serving in Indian Navy graced the event.

For the Farewell segment, Rupalpreet Kaur (MCA-II (E)) was crowned Miss Farewell, and Shakti (MSc-II) received the title of Mr. Farewell, both recognized for their exceptional contributions and influence during their academic journey. The Best Performer awards went to Barleen Kaur (MCA-II (M)) and Aakash Shukla (MCA-II (E)) for their outstanding achievements, while Kajal (MSc-II) and Anmol (MSc-II) were titled Miss and Mr. Personality for their charm and grace. Pratiksha (MCA-II (E)) and Harsh Kumar (MCA-II (E)) were honored with the Well-Dressed titles for their impeccable style.

The Freshers' portion of the event radiated excitement, welcoming new students with open arms. Nancy (MCA-I (E)) was crowned Miss Fresher, while Sahil Sharma (MCA-I (M)) earned the title of Mr. Fresher, both showcasing remarkable promise. Manmeet Singh (MCA-I (E)) was named Mr. Personality, and Himani (MCA-I (M)) received the title of Miss Charming for her elegance. Vishvjeet (MCA-I (E)) and Shria Bhardwaj (MSc-I) stood out for their fashion sense and were awarded the Well-Dressed titles. The Best Performer awards went to Pulkit (MCA-I (E)) and Harkirat (MCA-I(E))

The day was filled with vibrant performances, including soulful songs, captivating dances, poetry recitations, and interactive activities such as ramp walks, fun games for teachers, and diverse cultural performances. The chief guest, alumni, faculty, and students alike were left inspired and entertained. The event concluded with the announcement of final results, honors for participants, and a heartfelt memory video, encapsulating the spirit of the day.

**– Taranjit [MCA-II (E)] & Jaskaran [MCA-I (M)]**

## Canvas Craft's Placement Drive

The Department of Computer Science and Applications (DCSA) recently organized an early November online placement drive in collaboration with Canvas Craft . This drive provided students with an excellent opportunity to demonstrate their skills and secure positions in the IT sector.

The placement process consisted of multiple stages. The first stage involved resume shortlisting, where 15 students were selected based on their qualifications and skills. These shortlisted students then proceeded to the first technical round, which tested their knowledge and problem-solving abilities. At the end of this round, four students were selected for the next stage.

In the second and final technical round, candidates were evaluated on their technical expertise and ability to handle real-world challenges. After a thorough assessment, Sakshi Sikri from MCA-II (E) was selected for the position offered by Canvas Craft.

The department congratulates Sakshi Sikri for this accomplishment and commends all the participants for their dedication and efforts.

**-Arsh Divya (MCA-1 Morning)**

# Grazitti Interactive's Placement Drive

The Grazitti Placement Drive was an incredible opportunity for students to demonstrate their capabilities and secure a bright career path. A total of 13 students participated in the rigorous selection process, which was divided into multiple elimination rounds.

The online test was conducted to test the problem-solving skills, out of 13 students, 7 students were selected. Then, the first technical round was conducted which resulted in the shortlisting of three candidates, showcasing their strong technical acumen. Moving onto the second technical round, two students advanced for the communication round, proving their expertise and problem-solving skills. After presenting their communication skill, the HR round was held which focused on assessing their interpersonal and professional readiness.

Finally, Jyoti Chauhan from MCA-II (M) emerged as the final candidate selected for the role, standing out for her exceptional performance across all the stages. This achievement reflects her dedication, technical proficiency, and determination to succeed in the future.

Department of Computer Science and Applications wishes the best and congratulates Jyoti for her future.

# DCSA Students Shine in Off-Campus Placements

Taranjit Kaur

Gurbir Singh

Kanika Sharma

The DCSA department is proud to share that after successfully nailing the on campus placements, students from our department have also shown promising achievements in off-campus drives. The success of these students has proven their caliber in the IT industry and how the department has played its role in helping them prepare for such challenges.

Recently, three of our students successfully got placed off-campus. Taranjit Kaur from MCA-II(E) as Full Stack Developer Intern at Business Web Solutions, Kanika Sharma from MCA-II(E) as Domestic Sales Associate at Jungleworks, and Gurbir Singh from MCA-II(E) as a Technical Team member at CSEWhy have achieved this feat after clearing multiple challenging rounds and now are looking forward to begin their career at their respective companies.

## मेरा देश

हुनर हिम्मत हौसला कुछ यूँ बता गया,
जीत के बाद जीत का जुनून दिखा गया।
तब सोने की चिड़िया थी, आज हीरो का खजाना है
यह देश, मेरा भारत नौजवानों का ठिकाना है।

# Student's Achievements

## Laurels of 65th Inter-Zonal Youth Fest and heritage

Suraj Kumar MCA I(E) showcased his exceptional artistic talent in the Fine Arts Installation event at the Inter-Zonal Youth Festival held on 12th November, 2024, earning the prestigious 2nd prize for his innovative and creative installation. This event, a prominent cultural platform, brought together students from various universities and colleges to display their artistic prowess. Suraj's work stood out among the entries, gaining recognition for its artistic excellence and originality, further strengthening the university's reputation in youth festivals.

Additionally, Lovesh Sharma MCA I(E) achieved 3rd position in the Mimicry event at the Inter-Zonal Youth Festival. His remarkable performance captivated the audience and judges alike, earning well-deserved praise for his dedication and talent.

**– Taranjit [MCA-II (E)] & Jaskaran [MCA-I (M)]**

## Panjab University Inter College Championship(MEN):

Sawan Singh, a student of MCA-II(M), and Manmeet Singh, a student of MCA-I(E), represented the Panjab University Campus team in the prestigious Inter-College Football Tournament.

# NEST Bharat Winning Stars

Vinita Arya and Disha Gupta of MCA-I(M) secured 2nd position in the NEST Bharat Quiz Competition held on 5th November, 2024, an event organized to honor Sister Nivedita, showcasing their exceptional knowledge and teamwork.

Bhavneet of M.Sc.-II secured 4th position (Consolation Prize) in the Speech Competition held by the NEST Organization in the Mathematics Department, impressing with her eloquence and confidence.

Cheshta Verma of M.Sc.-II won 3rd prize in the Poster Making Competition organized by the NEST Organization in the Mathematics Department, demonstrating her artistic creativity.

**-Taranjit Kaur [MCA-II(E)]**

## UGC-NET June 2024:

Mohit Chaudhary, MCA-II(M) has successfully cleared UGC-NET 2024. This remarkable achievement reflects his dedication to research and academic excellence. We congratulate him on this milestone and wish him continued success in his future endeavors.

India's sports market to hit $130 billion by 2030, says Deloitte

# Vikram Garg

## About

Vikram Garg is an accomplished Senior Embedded Software Engineer at Verisure, bringing a wealth of expertise in designing, developing, and optimizing embedded systems. With a strong foundation in Software Engineering, Vikram specializes in creating innovative solutions for security and smart technology products. His role at Verisure highlights his commitment to advancing cutting-edge technology, ensuring reliability, and enhancing user experiences. A problem-solver at heart, Vikram's contributions demonstrate technical excellence and a drive for innovation in the embedded software domain.

## Message for Students

"Going to University—especially one as prestigious as Panjab University—will be a wonderful experience. This is an opportunity for you to learn not just about the world around you but also about who you are and what you want to do in life. At times, it will be challenging. Some days, you may even wonder if you're on the right path. Regardless, make the most out of the experience. Embrace every opportunity for growth that comes your way, and when you find something you're passionate about, persist. Most importantly, remember to have fun and make memories. The friends you will make here will go a long way throughout your life, so don't miss a chance to make one."

# Oral Presentation Prize in CHASCON

Our research scholar S. Ratna recently achieved remarkable success in the CHASCON oral presentation held from 6th to 8th November, 2024. She won the 2nd prize for her presentation on the topic, *"Hybrid Generalized Aggregation and Topological Adaptive Graph Convolutional Network."* Her presentation demonstrated advanced research and in-depth knowledge in Graph Neural Networks, which earned her recognition among her peers and experts at the conference.

Additionally, eight research scholars from DCSA participated in the conference, showcasing the department's commitment to research excellence. The participants were Mamta, Devki, Swaranjeet, Veerpal, S. Ratna, and Jatender.

The department congratulates S. Ratna on her outstanding achievement and applauds all the participants for their hard work and dedication. Their participation in CHASCON highlights the growing research culture at DCSA and the continued pursuit of academic excellence.

**-Arsh Divya (MCA-I Morning)**

## Hugging Face: AI and machine learning platform

Hugging Face is changing the way researchers, developers, and data scientists interact with machine learning models, especially NLP. Originating as one of the most popular platforms for NLP models, this has grown into a full-fledged platform that performs text analysis, image recognition, and much more using the small and big language models. Another of the most crucial tools in the Hugging Face arsenal is the library of pre-trained models of transformers, where it has simplified accessing already trained models for things like text classification, translation, summarization, and many more things. So, with these models having been trained on really large datasets and with a language understanding complex enough to do many languages, they perfectly fit into situations where people speak different languages. This is particularly useful in the case of research projects in languages other than English, as Hugging Face also provides pre-trained models that are fine-tuned on languages such as Hindi, French, and German, among many others.

The Hugging Face Model Hub is a space where users can collaborate to store, share, and browse thousands of already trained models. Researchers can upload their own models or modified versions of existing ones to this hub. These, therefore, makes others find easy ground to test, improve, and apply them in various scenarios. Researchers working with a small to large-scale language model can post their projects to Hugging Face so that very many people share in the work. This makes people work together and encourages new ideas. Hugging Face also works with Hugging Face Spaces, the fun and interactive website where users can put their models into use as web applications. Researchers can display their work in an easy-to-use interface with the Spaces. This allows other people to try out their models without them needing to set up or set up anything locally. Summarily put, Hugging Face is the mightiest community, speeding up research in NLP, thereby making machine learning models easy to share and apply. Helping eradicate language barriers and support linguistic diversity, Hugging Face supports global collaboration into AI and ML research by offering high-quality models easily accessible and in use.

# Anil Kumar defended his Ph.D. in November 2024

Dr. Anil Kumar is Assistant Professor in G.G.D.S.D College, Hariana, Hoshiarpur, Punjab. He successfully defended his Ph.D. on 22nd November, 2024 with a thesis titled *"Improved Hybrid Book Recommendation System Based on Ontology and Sentiment Analysis."* His research focuses on integrating quantitative and qualitative data, including user ratings, reviews, and behavior, to enhance the quality of recommendations for learners.

He proposed and implemented an innovative architecture named HSBRS (Hybrid Sentiment-Based Collaborative Architecture for Book Recommendation System). His work explores advanced Machine Learning and Deep Learning techniques, such as Collaborative Filtering, Pattern Mining, and LSTM RNN-based sentiment analysis. Dr. Kumar's research exemplifies a visionary approach to advancing computer science, driving innovation, and harnessing emerging technologies to address complex challenges.
