DCSA Successfully Conducts Counseling for M.Sc. C.S (Data Science) & MCA Admissions 2025

The department successfully conducted the counseling sessions for the M.Sc. C.S. (Specialization in Data Science) and the Master of Computer Applications (MCA) programs on August 8, 2025, and August 11, 2025, respectively. The admission process was meticulously planned and seamlessly executed under the guidance of Prof. (Dr.) Sonal Chawla, Admission Co-ordinator, and Dr. Supreet Thapar, Admission Co-coordinator, under the supervision of Dr. Anuj Sharma, Chairperson, DCSA.

The sessions brought together the collective efforts of the entire faculty, with Dr. Anuj Sharma, Prof. R.K. Singla, Prof. Indu Chhabra, Prof. Sonal Chawla, Prof. Anu Gupta, Dr. Rohini Sharma, Dr. Jasleen Kaur Bains, Dr. Balwinder Kaur, Dr. Anuj Kumar, Dr. Supreet Thapar, Dr. Kavita Taneja, Ms. Anjali Jindia , Mr. Ujjwal Thakur and Ms. Kamakshi Pundir actively contributing to the process. A special contribution was also made by our Research Scholars, Ms. Vaishali and Mr. Karan, whose efforts significantly supported the process. Their dedicated support was further strengthened by the faculty of the regional campus, including Prof. Munish Kumar Jindal, Prof. Satish Kumar, Dr. Rajinder Kumar, and Dr. Mohinder Kumar, whose involvement added immense value to the admission drive.

Equally commendable was the contribution of the department's technical and non-teaching staff—Ms. Binh, Ms. Seema, Mr. S.S. Kalsi, Ms. Pooja ,Mr. Sirhind,

Mr. Varinder, Mr. Manpreet Singh, and Mr. Mangat — who played a pivotal role in assisting students with document verification, guiding them through the seat allotmentprocedure, and providing clarity regarding tuition fee and hostel facilities. Their efforts ensured that the process was smooth, student-friendly, and efficient.

The counseling process was conducted in a well-structured and systematic manner to ensure a smooth admission experience. More than 140 students came to attend counseling for the M.Sc. C.S. (Specialization in Data Science) and almost 600+ students for MCA. Students were first briefed about the procedure and assisted in arranging their documents in the required order. To maintain uniformity, cover sheets were applied and files compiled before verification. The Verification Committee ensured authenticity and compliance with admission requirements, after which students proceeded to the Seat Allotment stage. The allotment was carried out in a transparent, merit-based manner, ensuring fairness for every applicant. Once seats were allotted, candidates received essential guidance about fee submission and hostel facilities, helping them complete formalities with confidence. To make the experience even more seamless, technical support and refreshments were also arranged, creating a comfortable environment throughout the process.

The counseling sessions achieved their objective of maintaining transparency, systematic verification, and smooth admission into the postgraduate programs of the department. Each step—from document verification to seat allotment—was carefully managed with efficiency and fairness. The successful completion of the admission drive stands as a testament to the department's commitment

to excellence, meticulous planning, and collaborative effort. The involvement of faculty, non-teaching staff, and student volunteers ensured not only a flawless process but also left the newly admitted students with a warm and positive first impression of the DCSA family.

-Nancy MCA-II (E) & Jaskaran Singh MCA-II(M)

Two - day Orientation Programme conducted for the new batches of M.Sc. and MCA (2025-2027)

The department opened its doors to the new batch of MCA (Batch 2025–2027) and M.Sc. Computer Science (Hons.) Specialization in Data Science students (Batch 2025–2027) with great enthusiasm through a two-day Orientation Programme held on August 25 and August 26, 2025. The programme was designed not just as a formal introduction, but as an engaging experience to help students connect with the faculty, curriculum, student clubs, and the many opportunities that Panjab University has to offer.

Day one began on a warm and welcoming note with a formal address by Dr. Anuj Sharma, Chairperson, who greeted the students with words of encouragement and shared his vision for academic excellence and holistic growth. This was followed by an Academic Curriculum Overview by Dr. Jasleen Kaur Bains, giving the students a roadmap of what lies ahead in their academic journey. The energy picked up further when student representatives of the Alumni, Cultural, Editorial, IT, and Environment clubs gave formal presentations of their respective clubs highlighting their initiatives, inviting students to dive right into extracurricular activities and community engagement. The Training and Placement Cell (TPC) also showcased its achievements and future plans, motivating students to gear up for exciting career opportunities. A highlight of the day was a guided visit to the prestigious Dr. A.P.J. Abdul Kalam Computer Centre, where Prof.(Dr.) Sonal Chawla, Director of the Centre, along with her team, introduced the students to state-of-the-art computing facilities. For many, this was their first real glimpse into the powerful infrastructure that supports learning and research at Panjab University.

The second day began on an inspirational note with a motivational session by Prof. R.K. Singla, Professor DCSA, whose talk left the audience both energized and reflective about their academic journeys ahead. This was followed by an introduction to the various facilities available across the

university, ensuring that the newcomers felt oriented not just to the department, but to the campus as a whole.

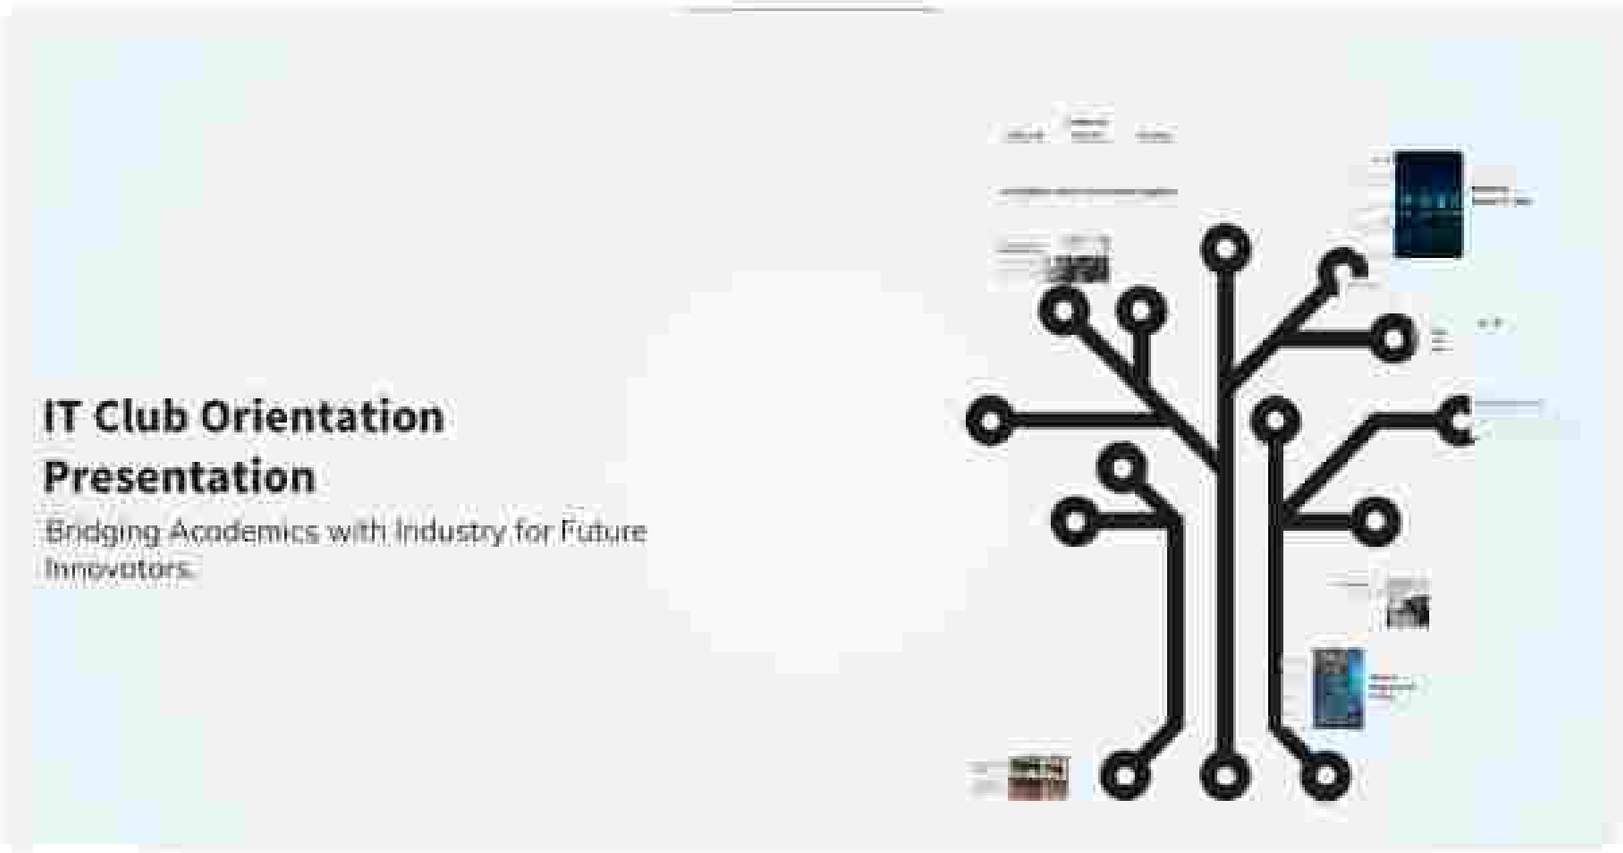

Adding a personal touch, senior students took the stage to share their own experiences, technical projects, and even creative talents, giving the new batch a sense of the vibrant and collaborative culture that defines DCSA. The programme reached its high point with a lively Ice-Breaking Session, where games, performances, and a talent hunt transformed the room into a hub of laughter, bonding, and new friendships. The main library visit, part of the Orientation Programme, was held on August 27, 2025, as per the slot allotted by the library authorities, since the proposed dates were unavailable. All the first year students visited the main library with Ms. Pooja Goel (Library Assistant) and Ms. Vaishali (SRF) to explore its resources, including books, journals, processes, and available facilities.

The Orientation Programme 2025 was a true team effort, efficiently coordinated by the Cultural Committee under the guidance of Dr. Jasleen Kaur Bains and Dr. Balwinder Kaur, whose dedication ensured its smooth execution and resounding success. By the end of the two days, the students walked away not just with information, but with inspiration, connections, and a sense of belonging to the DCSA family.

Formation of the IT Club at DCSA

The IT Club has been established in the department with the primary aim of bridging the gap between academic learning and industry requirements. The club's vision is "To empower students with practical skills, industry knowledge, and collaborative projects, enhancing their employability and innovative capabilities." Its core objectives are to create a dynamic learning environment for developing practical IT skills, prepare students for placements and internships, increase the department's presence in national and global hackathons, skill development workshops, and collaborative projects.

During the recent Orientation Program, the IT club student coordinators showcased two key projects to reflect the club's innovative approach. The first project, Virtual Body Cloner, is an AI-based system that replicates human body movements virtually, providing insights into human-computer interaction. The second project, Temporal Aura, maps the human body and demonstrates how machines perceive the world, offering a unique perspective on machine vision and body tracking. These projects generated considerable interest among newly enrolled students, reflecting a strong eagerness to contribute to the core team.

The recruitment process for the IT Club was conducted through a Google Form, emphasizing students' passion and relevant skills, resulting in a diverse and motivated core team. The club is guided by Faculty Coordinators, Dr. Rohini Sharma and Dr. Jasleen Kaur Bains, who provides academic and industry insights. The Student Coordinators leading the club are Jaskaran Singh MCA-II (M), Sayak Biswas MCA-II (E) and Nayan Joshi M.Sc. (DS).

The student core team consists of field heads specializing in areas such as Web Development, App Development, and Artificial Intelligence, supported by active working members who participate in various projects and events. Several activities are planned in coming months, including orientation and core team formation, skill development workshops on Git & GitHub and LinkedIn optimization, as well as industry tool exposure sessions covering Figma, VS Code Extensions, and AI tools for efficient coding. The IT Club is open to all students of DCSA and is committed to cultivating a culture where real-world IT exposure complements academic learning, enabling students to develop industry-relevant skills and prepare for successful careers in technology.

-Sayak Biswas M.C.A-II(E) & Nayan Joshi M.Sc. -II (DS)

Placement Updates

Cotiviti (formerly Edifecs) Placement Drive

The department organized its first placement drive with Cotiviti (formerly known as Edifecs) in July 2025, marking a significant milestone. The process commenced with an online test on July 18, 2025, which was designed to evaluate students' aptitude, problem-solving ability, and communication skills. Based on their performance in the test, students were shortlisted for further interview rounds.

The interviews were conducted in two batches on July 21, 2025, and July 23, 2025, comprising three rounds. The process began with the Technical Round, followed by the Manager/Hiring Round, and concluded with the HR Round. These rounds offered students a valuable platform to demonstrate their technical expertise, problem-solving abilities, and interpersonal skills.

PLACEMENT UPDATES

A total of 20 students successfully cleared all stages of the selection process, and their internships are set to begin in January 2026.

The successful conclusion of this placement drive not only instilled confidence among students but also enhanced the department's reputation for nurturing industry-ready professionals. It highlighted the caliber and commitment of the students while reinforcing the department's dedication to building strong corporate partnerships and creating impactful career opportunities.

The long-standing association of Edifecs(Cotiviti) with the department has been remarkable, as the company has consistently been a mass recruiter for DCSA over the years. The department acknowledges with gratitude the continued support of Edifecs(Cotiviti) HR team and extends special appreciation to its alumni working at Edifecs(Cotiviti), whose achievements and presence have paved the way for stronger ties and opportunities for current students.

- Kashish Dhamija MCA-II (M)

Grazitti Interactive Placement Drive

The department successfully organized an on-campus placement drive for MCA students on August 1, 2025, in collaboration with Grazitti Interactive. The recruitment process was conducted in a series of eliminatory rounds, each designed to assess the aptitude, communication, and technical proficiency of the participating students. The drive began with an aptitude test, after which 11 students were shortlisted to move ahead. The shortlisted candidates then engaged in the group discussion round to assess their communication, analytical thinking, and teamwork abilities. Students who cleared this round proceeded to the two phases of technical interviews, where their subject knowledge and problem-solving abilities were thoroughly evaluated. After the final stage of interviews, four students were selected by Grazitti Interactive. The selected candidates are Arsh Divya (MCA - II [M]), Aayush Samiyal (MCA - II [E]), Arshdeep Singh (MCA - II [Regional Centre Hoshiarpur]), and Saakshat (MCA - II [E]).

The placement drive proved to be a valuable opportunity for students to experience real-time recruitment procedures and engage with industry professionals. The department congratulates the selected students and expresses sincere gratitude to Grazitti Interactive for conducting the drive and supporting the career growth of its students.

PLACEMENT UPDATES

Over the years, Grazitti Interactive has also recruited alumni from the department, who are now contributing meaningfully to the organization's success. Their achievements have further strengthened the relationship between the company and the department, paving the way for greater opportunities for future batches.

Faculty Outreach

Expert talk by Dr. Anuj Sharma

On July 2nd, 2025, Dr. Anuj Sharma delivered an insightful talk on "Introduction to Cyber Safety and Security" during the Cyber Awareness Workshop held at MGSIPA, Chandigarh. The event was attended by students, faculty, and professionals who were keen to enhance their knowledge of the rapidly growing domain of cybersecurity.

Dr. Anuj Sharma was warmly welcomed by the institution and participants. His session aimed to raise awareness about the importance of cyber safety in today's digital era and the critical role of security practices in safeguarding personal and organizational data. He elaborated on various cyber threats such as phishing, malware attacks, identity theft, and ransomware, and emphasized preventive strategies to minimize risks.

The talk also highlighted best practices for secure internet usage, password management, safe social media behavior, and the significance of digital hygiene. Dr. Sharma further discussed the growing demand for cybersecurity professionals and the immense career opportunities available in this field.

An engaging interactive session followed, where participants asked practical questions about online safety and real-life security challenges. Dr. Sharma addressed these queries with clarity, offering valuable guidance and actionable steps for individuals to strengthen their cyber defense.

The event proved to be highly informative and impactful, spreading awareness about cyber safety while inspiring participants to adopt responsible digital practices. It successfully encouraged attendees to explore the evolving domain of cybersecurity and its role in shaping a safer digital society

- Sargundeep Singh MCA-II (M)

Appointment of Dr. Rohini Sharma as Associate Director, Central Placement Cell

The department proudly announces the appointment of Dr. Rohini Sharma as the Associate Director of the Central Placement Cell, Panjab University, Chandigarh on August 1, 2025.

With her dynamic leadership and strong academic background, Dr. Sharma brings a wealth of experience to the Placement Cell. Over the years, she has actively contributed to both teaching and research in the fields of Artificial Intelligence, Machine Learning, and emerging technologies. She has guided numerous students in research and projects, while also promoting industry-linked learning through workshops, expert talks, and academic collaborations.

In her new role, Dr. Sharma will play a pivotal part in strengthening industry–academia relations, facilitating placement opportunities, and enhancing student career readiness. The Central Placement Cell under her guidance aims to expand collaborations with leading companies, introduce skill-oriented training modules, and conduct capacity-building programs for students across diverse disciplines.

Sharing her vision with the student community, Dr. Sharma stated: "The Central Placement Cell of the University is dedicated to bridging the gap between academic excellence and the dynamic demands of the industry. It ensures the holistic development of the students by organizing workshops, technical sessions, industry–academia meets, and various other events. Your active participation is the key to unlocking your potential. Being a member of the DCSA family, I ensure full support to students. Embrace every opportunity and give your best."

This significant achievement reflects the department's commitment to nurturing faculty leadership and empowering students with avenues for professional growth. The department extends heartfelt congratulations to Dr. Rohini Sharma and looks forward to her continued contributions in fostering student success.

- Jaskaran Singh MCA-II (M)

Dr. Anuj Sharma as Chief Guest at TECHMANTHAN 3.0

Dr. Anuj Sharma was invited as the Chief Guest at TECHMANTHAN 3.0, organized by BCM Arya, Ludhiana on August 22, 2025.

Dr. Sharma delivered an invited talk on Artificial Intelligence (AI), highlighting its applications in modern technology and its potential impact on robotics, drones, and real-world problem solving. His talk was well-received by the participants and inspired the students to explore AI-driven innovations in their academic and professional journeys.

He also distributed prizes to the winners, motivating students to further explore and excel in the fields of AI, robotics, and automation.

The event proved to be a vibrant platform for young innovators, combining knowledge, creativity, and inspiration.

- Arsh Divya MCA-II (M)

Dr. Rohini Sharma Delivers Insightful Lecture on Machine Learning and Deep Learning at FDP

On August 22, 2025, participants of the One-Week Faculty Development Program (FDP) on "AI Driven Innovation and Research: Rethinking the Future" at PCM SD College for Women, Jalandhar, had the opportunity to attend an engaging lecture by Dr. Rohini Sharma on "Machine Learning and Deep Learning." Organized in collaboration with the Council for Educational Administration Management (CEAM), Kerala, the session invited participants to dive deep into the fundamentals and evolving trends of machine learning and deep learning.

What made the lecture stand out was its interactive nature—faculty members not only explored the core concepts but also discussed how these technologies are shaping research and innovation across diverse domains. Participants were encouraged to reflect on how AI-driven methodologies could be adapted into their own teaching and research practices, making the session both thought-provoking and practical. The lively discussions and exchange of ideas left the audience with fresh insights and actionable knowledge, earning much appreciation. Beyond enriching the FDP, this session also showcased the department's commitment to active knowledge sharing and contributing meaningfully to academic and research conversations on national platforms.

- Jaskaran Singh MCA-II (M)

DCSA Students Excel in UGC-NET June 2025 Examinations

Students from Panjab University's MCA program have once again brought laurels to the department by qualifying the prestigious UGC-NET examination, marking significant milestones in their academic journeys. Abhishek Kamboj (MCA - II [M]), Parmpreet Kaur (MCA - II [M]), Shivam Jerath (MCA - II [M]), and Twinkle (MCA - II [M]) have successfully cleared the UGC-NET, June 2025 Examinations.

Abhishek Kamboj

Parmpreet Kaur

Shivam Jerath

Twinkle

Their achievements reflect dedication, perseverance, and academic excellence, further strengthening the department's tradition of success in national-level examinations. These results not only highlight the students' commitment to higher education and research but also serve as a source of inspiration for their peers to aim high and excel in their academic pursuits.

The students credited their success to consistent preparation, disciplined study routines, and the guidance of faculty mentors who provided them with the right academic environment and motivation. They expressed heartfelt gratitude towards the Department of Computer Science and Applications for its continuous support, access to resources, and encouragement that played a pivotal role in shaping their success.

- Arsh Divya MCA-II(M)

MCA Admission Predictor

Editor's Comment:

This work is published as an individual, self-motivated study on admission trends. It reflects the author's independent effort and should not be considered as an official projection or representation by the department.

Sayak Biswas, a student of MCA -II [Evening], developed an innovative AI-powered system named the MCA Admission Predictor. This smart tool is designed to help MCA aspirants evaluate their chances of admission with greater clarity and confidence. By combining real admission data with machine learning techniques, the system simplifies the admission process, making it more transparent and student-friendly.

The admission predictor functions as a pre-counseling guide where students can input their total marks, category, and session preference (Morning/ Evening). In return, they receive predictions on their admission status, the probability of admission, and the expected predictive cutoff for their category and session. This allows aspirants to understand their prospects in advance and plan accordingly, reducing the uncertainty that often surrounds the admission process.

Behind the scenes, the tool leverages advanced machine learning models such as Random Forest regressors and classifiers. These models are trained on carefully prepared datasets that simulate admitted and non-admitted candidates. The data is designed conservatively so that the average marks of predicted admitted students remain slightly higher than actual cutoffs. This ensures that predictions are both realistic and reliable, while also maintaining a safe margin for aspirants.

From a technological perspective, the project demonstrates how modern web technologies can be seamlessly combined with Artificial Intelligence. The front end is designed using HTML, CSS, and Tailwind for a clean and user-friendly interface, while the backend is powered by Flask (Python). Machine learning tasks are handled using Scikit-learn, Pandas, and NumPy, with databases like MySQL or SQLite ensuring proper data management.

The MCA Admission Predictor is not only a practical contribution for prospective students but also a testament to the innovative spirit of our department. By applying Artificial Intelligence and Machine Learning to solve a real academic challenge, this project shows how technology can be used to improve transparency, reduce stress for students, and enhance the overall admission experience.

The tool is freely accessible online at:

Alumni Corner

Alumni Spotlight: Sumit Kumar – From DCSA to Technical Lead at Taazaa Inc.

Sumit Kumar, a distinguished alumnus of Panjab University, pursued his Master of Computer Applications (2010-2013) from DCSA. He is currently serving as a Technical Lead at Taazaa.inc and mentor in the field of web development, where he leads teams, ensures best practices, and actively fosters a culture of continuous learning. Beyond his professional commitments, he engages as a public speaker, sharing his knowledge and insights with wider audiences, inspiring many to grow in their careers.

He has several notable achievements to his credit, including successfully leading and mentoring teams to deliver high-quality web solutions. He has actively contributed to organizational process improvements and is recognized for fostering a collaborative culture of knowledge-sharing and continuous learning. As a speaker at Taazaa Inc., he has engaged audiences by spreading awareness on technical and professional growth. His efforts have been acknowledged with the prestigious 'Mentor of the Year' award.

Sumit fondly recalls his days at DCSA as some of the most cherished years of his life. The friendships, academic experiences, and hostel life shaped him both

personally and professionally. He remembers evenings spent near the library, sipping tea, having endless conversations, and the camaraderie of hostel life — from table tennis matches to late-night study sessions, playing cards, and the spontaneous trips to PGI for paranthas. Reflecting on this phase, he describes his time at Panjab University as "one of the most precious phases of my life."

Message to DCSA Students:

"Explore, experiment, and try as many new things as you can while at university. Once you set your goal, commit to it fully and give it more than 200%. Enjoy your university life like a child at play, but be prepared to step into the real world as a responsible adult. These few years will shape your future, so find the right balance — make lasting friendships, create memories, and stay focused on your goals."

Sumit Kumar's inspiring journey reflects the strength of determination, the value of mentorship, and the importance of a strong educational foundation. The department takes pride in his accomplishments and wishes him continued success in all his future endeavors
