Event: 'Role of Artificial Intelligence in Tourism'

DATE: 29-01-2024

Report

Prof. Prashant Kumar Gautam from Institute of Hotel and Tourism management, Panjab University delivered special lecture on "Role of Artificial Intelligence in Tourism" in DCSA Panjab university on 29th January, 2024.

Prof. Gautam explained about how AI can analyze large amounts of data, including user preferences, behavior, and past interactions, to provide personalized recommendations for travel destinations, accommodations, and activities. AI in tourism streamlines operations, enhances personalized experiences, and improves customer service. It enables predictive analytics for optimized pricing and resource allocation, ultimately fostering efficiency and innovation in the travel industry.

Prof. Prashant also told that future scope of AI in tourism lies in further advancements in personalization, as AI algorithms continue to refine and tailor travel recommendations based on individual preferences. Additionally, AI-driven virtual assistants and chatbots will become more sophisticated, providing seamless and intuitive customer interactions. Predictive analytics will play a crucial role in anticipating travel trends and optimizing business strategies. As technology evolves, applications like augmented reality (AR) and virtual reality (VR) powered by AI may redefine the way travellers experience destinations, offering immersive and interactive travel content.

Special Lecture on
Role of Artificial Intelligence in Tourism

Professor Prashant Kumar Gautam
University Institute of Hotel and
Tourism Management (UIHTM)
Panjab University, Chandigarh, India

ABSTRACT

Artificial intelligence (AI) is revolutionizing tourism, from chatbots answering questions to AI-powered recommendations. AI personalizes travel experiences, recommends hidden gems, and avoids tourist traps. Chatbots and virtual assistants provide 24/7 support and booking assistance. AI optimizes operations, predicts flight delays, and manages luggage handling. AI personalizes marketing campaigns and sales offers, reaching the right audience with the right message. Overall, AI makes travel more efficient, personalized, and enjoyable
