Expert Talk by Dr. Anuj Sharma on Artificial Intelligence: Role in Today's Life and Key Techniques

On February 7, 2026, Dr. Anuj Sharma was invited as a speaker at the Punjab Science Congress, organized at GGDSD College, Sector 32. The event brought together academicians, researchers, and students from various institutions, providing a platform for the exchange of scientific ideas and discussions on emerging technologies.
Dr. Anuj Sharma delivered an insightful lecture on "Artificial Intelligence: Its Role in Today's Life and Major Techniques in Use." In his address, he discussed how Artificial Intelligence has rapidly evolved from a specialized research domain into an integral part of everyday life. He highlighted its growing impact across multiple sectors, including healthcare diagnostics, financial systems, education technology, governance, smart infrastructure, and digital communication. During the lecture, he also explained several key techniques currently shaping the field of Artificial Intelligence, such as Machine Learning, Deep Learning, and Natural Language Processing. He emphasized that understanding AI is becoming essential rather than optional in today's technology-driven world.

A particularly engaging segment of the session was the interactive discussion that followed the lecture. Students raised thoughtful questions regarding career prospects in Artificial Intelligence, the skill sets required to enter the field, potential research opportunities, and the societal impact of automation on future employment. Dr. Anuj Sharma addressed each question with clarity and enthusiasm, sharing valuable insights from his academic and administrative experience.

In the session, he encouraged students to build strong foundational knowledge, stay updated with emerging technologies, and approach AI with responsibility and ethical awareness.

Overall, the session was highly insightful and thought-provoking. It provided attendees with a deeper understanding of the practical relevance of Artificial Intelligence and inspired students to explore the field with greater curiosity, awareness, and academic interest.

MCM DAV College IT Fest Graced by Dr. Anuj Sharma

On February 27, 2026, Dr. Anuj Sharma was invited as the Chief Guest for the Inter-College IT Fest organized at MCM DAV College, Sector 36. The theme of the fest, "Emerging IT Trends & The Road Ahead," highlighted the growing influence of technology and encouraged participants to explore future possibilities in the field of information technology. Students from various colleges enthusiastically participated in a wide range of events, including E-Collage Making, Web Designing, Research-Based Poster Making, E-Waste Modelling, Debugging, IT-Based Rangoli, IT Quiz, and Movie Making. These activities provided students with an opportunity to showcase their creativity, technical knowledge, and innovative thinking.

The prize distribution ceremony began with a formal welcome of the Chief Guest by the Principal and faculty members. Dr. Anuj Sharma presented trophies and certificates to students who demonstrated excellence in the various competitions. In his address to the gathering, Dr. Anuj Sharma congratulated the winners and appreciated the efforts of the organizing committee as well as the enthusiastic participation of students from different colleges. He spoke about the rapid transformation in the field of information technology and encouraged students to go beyond textbooks, continuously learn new skills, and stay updated with emerging technological trends. His motivating words inspired students to strive for excellence in the ever-evolving world of IT.

The presence of Dr. Anuj Sharma as the Chief Guest added great value to the event and served as a source of inspiration for the young minds present.

Student Corner

Celebrating DCSA's Winning Streak

The corridors of DCSA are filled with pride. What began with small inter-college victories has grown into bigger challenges, showing that our students have both the speed for quizzes and the stamina for 36-hour hackathons.

The journey began at Digitrade 2026, organized by Post Graduate Government College, Sector 46, on February 18, 2026 where MCA Evening students, Faiz Alam and Faham, won First Prize in Debugging, and Third Prize in IT Quiz went to Amanpreet Kaur (MCA-I(E)) and Banita (MCA-I(E)).

DCSA students brought home three top prizes at the IT Fest hosted by PGGC-42 on February 14, 2026. Shashwat Sharma (MCA-E) and Diya Ahuja (MCA-M) won First Prize in the IT Quiz, Aayushi Manchanda (MCA-M) and Kashish Arora (MCA-E) secured First Prize in Web Design, and Vanshika Verma (MCA-E) with Ramita (MCA-E) achieved First Prize in Prompt Engineering. These wins added another proud chapter to the department's growing list of achievements.

On February 27, DCSA marked a strong presence across multiple campuses. At Tech Zeal 2026, organized by PGGC for Girls, Sector 11, Ashish (MCA-E) and Monika (MCA-M) secured First Prize in IT Quiz, while Girija Sharma (MCA-M) and Prachi (MCA-M) won First Prize in Debugging. At the same time, iTech Fiesta 2026 at MCM DAV College for Women, Sector 36, brought more achievements: Arnav Khantwal (MCA-M) and Diya Ahuja (MCA-M) took First Prize in IT Quiz, Balpreet (M.Sc. (Hons) C.S. , Specialization in Data Science) and Akriti(M.Sc. (Hons) C.S. , Specialization in Data Science) earned First Prize in Research Poster, Rajat (MCA-M) and Amanpreet Kaur (MCA-E) bagged the first prize in Debugging, and Aayushi Manchanda (MCA-M) with Phunchok Dolma (MCA-M) achieved Second Prize in Web Designing.

The highlight of the month was the Escape Da Vinci Hackathon at CGC University, Mohali, on February 27–28. Competing against 82 teams and more than 330 innovators from across India, our students showed remarkable endurance and skill. The team Andaze Fun, comprising Faiz (MCA-E), Faham (MCA-E), Kashish (MCA-E), and Ronak (MCA-E), secured a cash prize of ₹5,000 and won the Best Newcomers award for their project "Vet Track AI." The participants shared, "We experienced excitement, pressure, and uncertainty. Things didn't always go as planned, but we kept learning and never lost hope."

The faculty and the department are proud of all the students for their achievements and extend their best wishes for continued success in the future. To those who returned without a trophy: "you came back with something even more valuable — experience and data. Every bug you couldn't fix is a lesson for tomorrow. Every missed clue is a pattern you'll recognize next time. You stepped into the arena while others stayed in the stands. You faced the compiler errors, the ticking clock, and the pressure of competition. You are the debuggers of tomorrow, and your resilience is the guarantee that our department's future will be stronger, sharper, and bug-free".

–Girija Sharma MCA-I(M) and Ramita MCA-I(E)

Manasvi Sharma won Best Volunteer Award at NSS Camp 2026

We are delighted to share that Manasvi Sharma(MCA-M), has been awarded the Best Volunteer Award for his outstanding dedication and active participation during the NSS Camp held from January 8, 2026 to January 14, 2026 at Panjab University campus.

The week-long camp brought together enthusiastic volunteers who participated in a variety of engaging and enriching activities. These included Poster making, rangoli competitions, youth celebrations, individual and group talks, along with several knowledge-enhancing lectures delivered by resource persons.

Sharing his experience, Manasvi said that the NSS camp was a wonderful opportunity to learn, interact, and grow as an individual. He also mentioned that receiving the Best Volunteer Award was an encouraging and proud moment for him. He strongly encourages all fellow students to take part in NSS camps to discover the best in yourself and gain new experiences . He further added that the camp gave him many unforgettable memories that he will always cherish.

The recognition received by Manasvi Sharma reflects the spirit of dedication and service promoted through the NSS program and brings pride to the department.

Alumni Corner

Words of Wisdom from Our Esteemed Alumna : Dr Ritika Bansal

Dear Students and Research Scholars of the Department of Computer Science, Panjab University, it is a matter of great pride to write to you as an alumna of this esteemed department and currently an Assistant Professor at MCM DAV College. My years at the Department of Computer Science, Panjab University were instrumental in shaping my academic thinking, research orientation, and professional journey.

I encourage each one of you to fully embrace the rich academic environment the department offers. Stay curious, question deeply, and pursue research with sincerity and passion. The field of Computer Science is constantly evolving, and your ideas, perseverance, and innovation can make meaningful contributions to both academia and society.

You are part of a proud legacy of scholars and professionals who have carried the name of the department to great heights. I am confident that with dedication and hard work, you will continue to strengthen this legacy and achieve remarkable success.
Wishing you all the very best for your academic and research endeavors.

Warm Regards,
Dr Ritika Bansal
Assistant Professor , MCM DAV College

Dr. Ritika Bansal completed her MCA from Panjab University (2007–2010) and later served as a faculty member in the Department of Computer Science and Applications, Panjab University, from 2010 to 2012. She went on to pursue her Ph.D. from 2012 to 2016, further strengthening her academic and research expertise.

Trends in Machine Learning: Should We Rely on ML or Traditional Approaches?

Machine Learning (ML) is becoming very popular in today's world. It helps computers learn from data and make decisions without strict rules. ML works very well in areas like image classification, language translation, and prediction tasks. Because of this, many people think ML can replace traditional algorithms.

On the other hand, when we look for traditional algorithms, they still have their place. They are faster, easier to use, and more reliable in simple tasks. They also do not need large datasets like ML models. Also, they are very important where there are fewer computing resources.

So, should we fully depend on ML? The answer is no. Both ML and traditional approaches have their own strengths. In many cases, combining both methods gives better results. For example, we can use traditional algorithms for basic processing and ML for prediction. In conclusion, the best solution is to use both ML and traditional methods together. This way, we can get accurate results and also maintain clarity.

Artificial Intelligence in Medical Image Processing: Transforming Healthcare

Artificial Intelligence (AI) is revolutionizing various sectors and one of the most impactful applications is in the field of medical image processing. With a fall in the health conditions worldwide, the demand for faster, accurate and more scalable healthcare solutions is growing at a rapid pace. AI is providing powerful tools which assist clinicians in diagnosing, analyzing and treating diseases using medical images. Techniques like X-rays, CT scans, MRI, ultrasound, mammography, and fundus photography enable clinicians to visualize internal body structures and detect anomalies. However, interpreting these images requires expertise and is often time-consuming. Radiologists and specialists are burdened with large volumes of imaging data, increasing the risk of fatigue and diagnostic errors. AI-powered image analysis is hence helping by automating the clinical decision-making process and enhancing diagnostic precision by reducing the human error and improving patient outcomes.

Artificial Intelligence offers a wide range of benefits in medical image processing. Firstly, AI models, especially deep learning algorithms, are capable of detecting subtle features and patterns in medical images that may not be easily recognized by human experts, which helps in early detection of diseases. Secondly, AI can process large volumes of imaging data much faster than a radiologist, reducing the turnaround time for diagnosis and allowing for quicker clinical decision-making. This is particularly valuable in emergency situations and high-demand settings. Moreover, AI systems offer consistency in image analysis. They also support scalability and cost-effectiveness by automating repetitive tasks, reducing the burden on healthcare professionals, and lowering operational costs.

Despite its significant potential, the implementation of AI in medical image processing faces several notable challenges. A primary concern is the availability of high-quality data due to privacy regulations, data-sharing restrictions, and labor-intensive process of expert labeling. Additionally, the integration of AI systems into existing clinical workflows can be difficult as healthcare professionals may be hesitant to adopt new technologies. Nevertheless, the growing collaboration between computer scientists, clinicians, and industry stakeholders will ensure that AI continues to evolve as a transformative force in the future of healthcare.

- Anupreet Kalsi (Research Scholar)

Ph.D. Enrollments 2026

On February 9, 2026, the Ph.D. enrollment process was successfully conducted in the department, marking an important academic milestone. A total of five candidates were enrolled into the doctoral program, reflecting the department's continued commitment to advanced research and academic excellence.

The enrolled scholars were Tanu Taya, Bhavneet Saini, Chestha, Anu Kaul, and Navneet Sandhu. All the candidates have qualified the UGC-NET examination, which highlights their strong academic foundation and readiness to undertake rigorous research work. Their selection is a testament to their dedication, subject knowledge, and research aptitude.

The enrollment process was carried out in a smooth and organized manner, ensuring that all formalities were completed efficiently. The addition of these research scholars is expected to further strengthen the department's research environment and contribute to ongoing and future academic initiatives.

Staff Spotlight: New Joining

The Department warmly welcomes Mr. Manik, who joined as a Senior Assistant on November 27 , 2025.

He holds M.Sc. IT degree and brings 25 years of experience, having previously worked as an IT Manager Head in a private company. He shared that his current role feels more relaxed and peaceful compared to his previous role. He praised the faculty and staff of the department for being extremely helpful and supportive. He said that although only a few months have passed since he joined, he already feels as if he has been working here for years because he adjusted so quickly and feels completely at home.

Mr. Manik believes in giving his full effort to the department without expecting anything in return. He also mentioned that he does not feel pressure here, as the department has given him a warm and welcoming environment. We all wish Mr. Manik a happy and successful journey ahead.
