Workshop on "Navigating the Job Market Landscape "

On 12 April 2022, , Dr dippy Aggarwal who is currently working in Intel corporation collaborated with Department of Computer Science & Applications, Panjab University to deliver a session on the above topic.

About the speaker:

She is an alumnus of DCSA (batch – 2007),currently working in Intel corporation as a software development engineer. She is living in America now and was on a visit to India.

About the event:

The session she conducted was on the topic "Navigating the Job Market Landscape ", wherein she talked about various challenges she faced when she was in our shoes as she also mentioned various points regarding the job searching strategies, fear of blanking out in an interview, how to be prepared for the technical interview, how to handle the outcomes of interview like rejections and negotiating offers.

She also mentioned that people look for instant gratification and also look for quick results but the things don't work in that way as we have to improve our skills to beat that benchmark and success is more like an iceberg which consists a lot more of persistence, dedication to reach that level. We would like to thank her for an enriching, interactive session with our students of DCSA.
