# Online Alumni Tech talk on "*Gap between industry and academic education*" 2020

*On 9th May 2020, Saturday. Mr. Rohan Mehta, department alumni(2016 Passout) delivered a webinar on 'Gap between industry and academic education'.*

About the event:

On 9th May 2020 mentor Mr. Rohan Mehta, department alumni delivered a talk on the "Gap between industry and academic education". In total 60 students from the department attended the online workshop.

The session started with the comparison of the various programming languages and their demand. The emerging jobs report in India was discussed Blockchain developer, AI specialist, Java script developer and Backend developer profiles were discussed. A direction towards career options and how to concentrate on certain aspects of projects and skills was given.

A comparison was made between the service and product-based companies and how the selection process differs for the companies. For product-based companies we need to be good in technical skills and these are great for us if want good growth. A glimpse of networking was given and how it was important for career growth.

The overall learning experience was good as real-life examples were given and a brief about the technical profile was explained. The importance of the resume and networking was explained. The webinar closed with some questions about the profiles and how to pursue them. The webinar was insightful as students got a glimpse about the real job prospective.
